1 Overview

8082 My IC Phone is a high end terminal intended for use in Hotel mode when connected to OmniPCX Enterprise or in **Business mode** when connected to OmniPCX Office or OpenTouch. The terminal (hardware/software) is the same for both modes but the list of supported features is different.

This document is the Technical Release Note for 8082 My IC Phone R260 in **Business mode**, software branch 1.010.x:

• **version 1.010.4** (and more recent as support versions) for OmniPCX Office R9.0 and OpenTouch R1.2.

The new features for OXO R9.0 (vs. R8.2 release) are:

- o Video calls between 8082 My IC Phone sets, using Logitech C920 webcams
- Video calls with video doorphone; multiple instances of doorcams supported
- o Programmable keys
- o Reduction of unavailability time during upgrade
- User interface and ergonomics improvements
- Remote software reset (from OMC)
- o 1 manager / 1 assistant capability (only manager set is 8082 My IC Phone)
- Software version awareness (during boot or upgrade)
- o "back to homepage" setting (to choose to go back to the homepage when exiting an application or the screensaver)
- Bluetooth® connectivity setting

The new features for OpenTouch R1.2 (vs. R1.1 release) are:

- Video calls between 8082 My IC Phone sets, using Logitech C920 webcams
- Video calls between 8082 My IC Phone set and OTC iPad
- Programmable keys
- Reduction of unavailability time during upgrade
- User interface and ergonomics improvements
- Supervision and call pick-up
- Auto-answer / receive 3rd party call for remote control by softphone (click to answer)

Note:

 This software version is compatible with both HW-1 (3MG27001AA) and HW-2 (3MG27036AA) versions. However video capabilities are available only on HW-2 version.

note to collect logs and information

3 Software Version Download

3.1 OmniPCX Office (OXO)

3.1.1 Download

Software of 8082 My IC Phone is embedded in the global OmniPCX Office call server software (higher or equal to OmniPCX Office R9.0). Support versions of 8082 My IC Phone software are delivered in support versions of OmniPCX Office (higher or equal to R9.0).

Several details related to the deployment of 8082 My IC Phone in OXO environment can be found in reference TG1729

oxo	8082 My IC Phone
R900/033.002	R260/1.009.2
R900/037.002	R260/1.010.3
R900/040.00x	R260/1.010.4

3.1.2 Collecting logs and information

In case a technical support ticket is created, it is advised to collect logs and information to send with the ticket.

getmyicphonelogs.zip file is available on the Enterprise Business Portal next to the software to help Business Partners to proceed. This file contains:

- readme.txt file
- getmyicphonelogs.txt file

In order to help pass through the security checks like anti-virus, getmyicphonelogs file has been zipped. After download, unzip it and rename 'getmyicphonelogs.txt' file in 'getmyicphonelogs.sh'.

This script collects information and logs on 8082 My IC Phone. More information is available in readme.txt file.

3.2 OpenTouch (OT)

3.2.1 Download

Software version R260.01.010.4 of 8082 My IC Phone must be downloaded from the Enterprise Business Portal:

https://businessportal.alcatel-lucent.com

When connected on the Business Portal it is available at location:

Customer Support > Technical Support > Software Download > OpenTouch Business Edition & Multimedia Services > Release 1.2 > Software My Ic Phone

Several details related to the deployment of 8082 My IC Phone in OT environment can be found in reference TC1755

At that location you will also find:

- The My IC Phone Synchronizer application which enables address book synchronization between Microsoft® Outlook application and the contact database of 8082 My IC Phone.
- The Technical release Note for My IC Phone Synchronizer.

OT Release	8082 My IC Phone SW version
R1.2	R260/1.010.x

3.2.2 Collecting logs and information

In case a technical support ticket is created, it is advised to collect logs and information to send with the ticket.

getmyicphonelogs.zip file is available with the software to help Business Partners to proceed. This file contains:

- readme.txt file
- getmyicphonelogs.txt file

In order to help pass through the security checks like anti-virus, getmyicphonelogs file has been zipped. After download, unzip it and rename 'getmyicphonelogs.txt' file in 'getmyicphonelogs.sh'.

This script collects information and logs on 8082 My IC Phone. More information is available in readme.txt file.

3.2.3 Hints for upgrade

Note 1: upgrade duration can take up to an hour, particularly for "out-of-the-box" installation.

Note 2: in case of trouble to upgrade the 8082 My IC Phone from its current version to R260 current version:

- check that the current software version is at least R200 1.027.2
- if not, then first upgrade the 8082 My IC Phone from its current version to R200 1.034.4 version, then you can upgrade to R260 current version.

Note 3: when upgrading from R250 to R260 release, in case Standard Homepage is used, then the history icon may be moved from the 1st page to the 2nd page. To get the history icon back to the 1st page, please use programmable keys feature (Settings > Application > Homepage > Move)

4 Reference Documents

Following documents can be accessed from the Enterprise Business Portal: https://businessportal.alcatel-lucent.com

From the main page of the Business Portal, in the "Quick access" area, click the link to enter the Technical Knowledge Base (TKB) tool.

4.1 Technical Communications (TC) - Troubleshooting Guides (TG)

In the $\underline{\mathsf{TKB}}$ tool select the "Latest Technical Communications" in the vertical menu on the left side.

In the new page, enter the TC or TG reference (ex. TG0065) in the "Search by number (TCxxxx or TGxxxx)" field and click return to get access to the document.

- TG0065: My IC Phone OT 8082 Troubleshooting Guide
- TC1692: Technical Release Note of 8082 My IC Phone R200/1.035.x
- TC1734: Technical Release Note of 8082 My IC Phone R250/1.011.x
- TC1726: Technical Release Note of 8082 My IC Phone R260/1.009.x
- TC1729: OmniPCX Office Release 900 / 033.002
- TC1755: Technical Release Note OpenTouch R1.2
- TC1616: Technical Release Note of My IC Phone Synchronizer
- TC1766: 8082 My IC Phone Hotel mode Technical Release Note R260.01.010.4

Following table provides some useful information to understand differences when using 8082 My IC Phone in various Call Server ecosystems

8082 My IC Phone	in OXE ecosystem	in OXO ecosystem	in OT ecosystem
Operating Mode	Hotel Mode	Business Mode	Business Mode
Troubleshooting Guide	TG0065	TC1619 TC1661	TG0065

External applications	Supported (only certified applications with existing <u>IWR</u>)	Supported (only certified applications with existing <u>IWR</u>)	Supported (only certified applications with existing <u>IWR</u>)

4.2 User Manual

In the <u>TKB</u> tool select the Product "OpenTouch Business Edition" or "OmniPCX Office", and the concerned release, in the vertical menu on the left side.

Then click "Search" to open the Search page:

- In the Reference Book section click "Unselect all" then click the tipbox "User Manuals" and "User Guides"
- o In the "Keywords" field enter the string "8082"
- o Then click "Launch the search" to access the document.

The following table gives the reference of the User Manuals in English language (US reference) for the different 8082 My IC Phone releases and Call Server ecosystems.

SW version	in OXO ecosystem	in OT ecosystem
R200	8AL 90835 US BB	8AL 90835 US CC
R250	N/A	8AL 90835 US CD
R260	8AL 90835 US BC	8AL 90835 US CE

Note: there is no User Manual for the Hotel mode (OXE ecosystem)

Available languages are:

US	English	SV	Swedish	SK	Slovak
FR	French	DK	Danish	SL	Slovenian
DE	German	EL	Greek	JA	Japanese
ES	Spanish	CS	Czech	IS	Icelandic
ΙT	Italian	PL	Polish	AR	Arabic

TR	Turkish	FI	Finnish	RU	Russian
NL	Dutch	TE	Estonian	CN	Chinese
HU	Hungarian	LT	Lithuanian	TW	Taiwanese
NV	Norwegian	LV	Latvian		

4.3 Technical Documentation

In the TKB tool select in the vertical menu at the left:

- Product "OmniPCX Office" Release "R9.0" to get information about operation of 8082 My IC Phone in OXO ecosystem
- Product "OpenTouch Business Edition" Release "R1.2" to get information about operation of 8082 My IC Phone in OpenTouch ecosystem

5 Technical Support

Technical support will be provided to OXO ACSE-certified or OpenTouch ACSE-certified.

Before contacting Alcatel-Lucent's Business Partner Support Center (ABPSC), make sure that you have consulted the <u>Troubleshooting Guides</u> (diagnostics support guides) where they exist and have performed the actions suggested for your problem (available on the Enterprise Business Portal under the headline Technical Knowledge Base).

Note: Certification programs are available on the Business Portal at location:

Training and Certification > Training Catalog > Training catalog by job function > Postsales

See Postsales training offer documents:

- Postsales OpenTouch Suite for SMB 2012 Q4
- Postsales_OV8770 Training Offer
- Postsales_OpenTouch Training Offer

Webapp Web Application. Generic name used to designate any application running on

8082 My IC Phone and providing interaction with the end user (for example the application managing communications which presents telephony features of the My IC Phone is a webapp, the application configuring alarms is a webapp, etc). There are two types of webapps: a native webapp is designed by <u>ALE</u> and integrated in the main software distribution. An external or third party webapp is designed, built and distributed by external developers in

accordance with **SDK** and certification process.

7 List of the features of 8082 My IC Phone

How to read the table:

Meaning of the color in the « Delivered » column					
Feature supported without known restriction					
	[Info] is used to highlight useful information about how to install, configure or use the feature				
	[Restriction]feature supported but with some restriction				
	Feature not available or not supported				

Feature Description	Delivered	Comments
Hardware capabilities		
Color Display 800 x 480		Color display with backlight. [Info] Display switches to screensaver mode after a programmable timeout.
External audio jack connector 3.5mm		Connection of a headset or a meeting room module (loudspeaker or handsfree module).
2-port USB 1.1/2.0		Only connection of memory stick and/or headset. [Info] USB connectors are not intended for the powering of USB accessories (except memory sticks or headsets) and this use is not supported in case of malfunction. Total output current for USB connectors is 600mA (3W). Example: if 500mA are drawn from one USB port to power a standard device, then only 100mA are available for the second USB port for a low power device. [Restriction] If 2 USB headsets are connected to the 2 USB ports, the USB headset function does not work.
2-port Ethernet		Ethernet 10/100/1000 Mbps for connection to the LAN (LAN port) and to a PC (PC port). [Info] LAN port is PoE 802.3af compliant. 8082 My IC Phone is Class 3 PD (Powered Device consuming not more than 12.95W). More information about PoE here
Touchscreen		Touchscreen for interaction of the terminal with the end user. [Info] To clean up the screen, use a lint-free, soft cloth. It may be very slightly dampened by water.
Haptic (tactile) feedback		Haptic (tactile) feedback is the mechanical feedback (vibration) provided by the touchscreen to improve interaction with the end user. [Info] The haptic (tactile) feedback is only active when pressing alphabetic keys or dialpad keys. [Info] At first initialization of the phone the haptic (tactile) feedback is deactivated. To enable haptic (tactile) feedback go to: Settings > Device > Phone Configuration

Fonture Description	Delivered	Comments
Feature Description	elive	Comments
	۵	Connection of the Bluetooth® handset or a Bluetooth® headset.
		[Info] The Bluetooth® handset is already paired to the terminal at the factory.
		[Info] Bluetooth® handset software is embedded in the 8082 My IC Phone software package. Automatic Bluetooth® handset software upgrade is done while 8082 My IC Phone is upgrading.
		[Info] When battery is completely discharged, full battery charge is reached after 16 hours of charge on the cradle.
Bluetooth® handset		[Info] When battery is fully charged: - Talk time is 10 hours Standby time is 60 hours (handset removed from cradle and in idle
		mode).
		[Info] MAC address of the Bluetooth® handset is printed on the label behind the battery. When Bluetooth® handset is paired to the 8082 My IC Phone, the MAC address can be checked in: Settings > Device > Bluetooth
		[Destriction] Physicsth® Handact does not support widehand so does
		[Restriction] Bluetooth® Handset does not support wideband codecs. Based on document: Degrees of Protection provided by Enclosures, (IP code) EN 60529
Ingress protection		Following classification is reached: - IP 50 protection level is to avoid visible dust under the LCD display window (this level is valid only for the LCD display area) IP 20 protection level for the terminal (applies NFC20-010 and DIN40050 standards) => test sphere 12.5mm
		The phone remains functional after the tests.
Accessories		Items intended for use with 8082 My IC Phone which must be ordered separately in the ALE commercial catalog
Corded comfort handset		[Info] Compatible only with HW-2 version.
		Reference: 3MG27032AA
		Powering of the terminal in case the Ethernet switch, which 8082 My IC Phone is connected to, does not provide PoE.
Power injector ever		Reference: . 3MG27035AA for European countries (except countries listed below) . 3MG27035AR for Argentina . 3MG27035AS for Australia . 3MG27035BR for Brazil
Power injector over Ethernet interface		. 3MG27035BR for Brazil . 3MG27035CH for Switzerland . 3MG27035CN for China . 3MG27035IN for India
		. 3MG27035IT for Italy . 3MG27035JP for Japan . 3MG27035UK for the United Kingdom . 3MG27035US for the USA
		<u>-</u> 33333 13. 4.13 33.1

Feature Description	Delivered	Comments
		Powering of the terminal in case, neither the Ethernet switch which 8082 My IC Phone is connected to, nor power injector are used.
Power jack adaptor		[Info] Compatible only with HW-2 version.
		Reference: . 3MG27006AA for European countries . 3MG27006AR for Argentina . 3MG27006RW for other countries
Locking kit		Small mechanical part designed to lock to the foot of the terminal. It provides a security slot for connection to a Kensington security cable.
		Reference: 3MG27033AA
		References: 3GV 28045AB: Corded Headset Jabra/GN Netcom 2100 mono-aural 3GV 28046AB: Corded Headset Jabra/GN Netcom 2100 bi-aural 3GV 28047AB: Corded Headset Plantronics H251 mono-aural 3GV 28048AB: Corded Headset Plantronics H251 bi-aural
Headsets		Other headsets not orderable in the ALE commercial catalog will be approved through the AAPP process and listed on the Enterprise Business Portal.
neausets		[Info] To make the headset operational, a manual action on 8082 My IC Phone may be necessary. For instance, after pairing a Bluetooth® headset, you must make sure that the accessory type "Bluetooth" is correctly selected in the audio settings.
		[Restriction] List of approved headsets for 8082 My IC Phone through the AAPP process is currently empty.
		[Restriction] Headsets not listed above and not in the AAPP approved list are not supported in case of malfunction.
Dattam for Divistanth®		Same item as for the Bluetooth® handset of IP Touch 4068.
Battery for Bluetooth® handset		Reference: 3GV28041AB
Webcam		Logitech C920.
		Reference: 3MG27024AA
Protocols		
Network TCP / IP		
802.1 P/Q		
Automatic VLAN		
Assignment (AVA)		
(only OpenTouch)		
DHCP		
SNTP + time zone		
management LLDP		[Info] It is not possible to manage LLDP-VLAN through 8082 My IC Phone
(only OpenTouch)		configuration menu.
LLDP geolocalization (only OpenTouch)		[Restriction] The location information can not be updated in time in local MMI after the 8082 My IC Phone acquired the LLDP message from switch port.

Feature Description	Delivered	Comments
LLDP POE		
(only OpenTouch)		
Quality of Service (QoS)		QoS tags for audio (RTP) and SIP signaling packets: - Layer 3: Differentiated Services (DiffServ) with IP TOS field - Layer 2: IEEE 802.1.p
SIP User Agent		
Support of RTP/RTCP		
IPv6		
Security		
http/https client		
User password (only OXO)		Manages voice mail access and phone set unlock.
GUI (system) password (only OpenTouch)		Manages phone set unlock. Access not possible yet on the phone set. Access possible through My IC Desktop.
TUI password (only OpenTouch)		Manages voice mail access. Access not possible on the phone set. Access possible through My IC Desktop.
2-port Ethernet switch management		[Info] Possibility to deactivate PC port for security reason.
802.1x MD5/TLS Authentication		
SIP TLS + sRTP		
Certificate download		
Save / Restore of user's personal settings (customization)		
Audio		
Ringing melodies (normal,		Several MP3 ringing melodies are embedded in the terminal. Selection of the preferred melody in the user's settings.
progressive, bip)		It is not possible to upload MP3 files on the terminal for use as ringing melodies.
		Narrowband codecs : - G711 (64kbit/s): A law and μ law - G729
Handset mode	4	[Restriction] Bluetooth® handset does not support wideband codecs.
		[Restriction] Rare cases of subjective "metallic" voice. In that case, the handset needs to be switched off then on.
Handsfree mode		Narrowband codecs: - G711 (64kbit/s): A law and μ law - G729 Wideband codecs: - G722 (48kbit/s, 56kbit/s, 64kbit/s, framing 20ms) - G722.2 also called AMR-WB. Bit rates from 6.60 to 23.85 kbit/s
Group listening mode		Narrowband codecs : - G711 (64kbit/s): A law and µ law - G729

Feature Description	Delivered	Comments
		Wideband codecs (Loudspeaker part only): - G722 (48kbit/s, 56kbit/s, 64kbit/s, framing 20ms) - G722.2 also called AMR-WB. Bit rates from 6.60 to 23.85 kbit/s

Conference (n mode) via		
add participant		
Manual dialing		
Redial from Call History or Contacts		[Restriction] The terminal does not generate the trunk line access code (generally a leading "0") when it dials automatically numbers from Call History or Contacts. Therefore external short numbers will fail unless specific configuration is implemented for these numbers in the call server (example: 3699 to call the "Speaking Clock" in France).
Busy Call		[Info] Busy tone is notified to the caller when 8082 My IC Phone has reached « SIPMaxCall » limit. See also "Multi-line feature below. [Info] When the number of active calls is lower than "SIPMaxCall", the terminal is considered as having free resource and therefore busy tone is not notified to the caller.

Feature Description	Delivered	Comments	
Call failure notification management			
Phone state notification		Top bar area with information about current phone state. Key press on this area restores the communication screen.	
Voice mail (consultation with DTMF, deposit, notification)			
Voice mail notification		[Info] Also called visual voice mail. VM log is splitted in two lists: 'New' and 'Messages'. Voice mails listed in 'New' switch to 'Messages' list as soon as they are listened.	
Call recording (in VM or multi-parties conference)			
CLIR (caller id hidden)		[Info] Activate or deactivate CLIR in Settings > Application > Telephony > Hide identity	
Multi-line		[Info] The number of concurrent calls is linked to the 8082 setting called "SIPMaxCall". [Restriction] When the setting "SIPMaxCall" is modified on the <u>DM</u> , it is mandatory to reset the 8082 My IC Phone so it can take the new value into	
Broker call (switch between 2 calls)		account.	
Call pick-up			
Call back request (CBR)		[Restriction] Supported with OT via voice prompt and DTMF code. Behavior depends on user's parameter "consider the user busy if one device is busy". Not supported on OXO.	
SEPLOS codes forwarding + return codes		The Supported on Orter	
Transfer in ringing			
Multi Device Routing (only OpenTouch)		[Restriction] It is not allowed to use an OT user for 'other phone' routing. [Restriction] After terminal reboot, the customized profile can not be selected the very first time if it has not been modified before selected. [Restriction] In some languages, some labels are truncated. [Restriction] A PC and a tablet are reckonized with the same label.	
Call Forward basic routing (only OXO)			
Video			
		[Info] Only Logitech C920 webcams are supported.	
Video peer-to-peer between two 8082 My IC Phone sets		[Restriction] No video conference call supported. [Restriction] No video call transfer supported. [Restriction] If A in video call with B, then A calls C (audio call) so B is held, then conference between A and B and C is established, then C leaves the conference, then video escalation between A and B should be possible but is not.	
		[Restriction] If A calls B, B answers then modifies audio volume, if video escalation from A occurs when audio toaster of B is up, then the screen	

Feature Description		Comments		
	Delivered			
		remains black on B side.		
Video peer-to-peer		Works with OTC iPad versions available on the AppleStore.		
between a 8082 My IC Phone set and an OTC		[Restriction] Works only on 1.1.32.10 iPad version.		
iPad		[Restriction] On iPad side, no possibility to refuse a video escalation.		
(only OpenTouch)		[Restriction] On iPad side, the video screen ration is not correct.		
		[Info] Doorcams will be approved through the AAPP process and listed on		
		the Enterprise Business Portal. Today only Linkcom Link Slim IP Door Phone is supported		
		www.linkcom.fr/en/door-phone/portier/link-slim-ip-door-phone		
		Multiple instances of doorcams supported.		
Video with doorcam (only OXO)		[Restriction] "Open door" label displayed only in English for all languages (except French language which is right).		
		[Restriction] Doorcam username/firstname must start with DOORCAM (uppercase).		
		[Restriction] While in communication with a doorcam, when answering a new incoming call, the call with the doorcam is cut.		
Video in User Service		The user can see his/her video by starting local video in User Service menu.		
High Availability				
Survivability		Only for OpenTouch (SIP Server)		
(only OpenTouch)		[Info] Take care that survivability "keepalive" timer is not too short (30s is a minimum).		
DHCP and DM survivability				
Serviceability				
Provisioning from DM (Device Manager)		Configuration files, SW download.		
Secured telnet (SSH)		See <u>TG0065</u>		
Terminal software		[Info] In case of trouble to upgrade the 8082 My IC Phone from its current version to R260 current version: - check that the current software version is at least R200 1.027.2		
download and upgrade		 if not, then first upgrade the 8082 My IC Phone from its current version to R200 1.034.4 version, then you can upgrade to R260 current version. 		
Embedded Services		See <u>TG0065</u>		
Migration		[Info] Do not migrate a terminal from a system to another without flash reset.		
Software version awareness		[Info] During boot, display of SW version (e.g. "R250.01.002.1") on the top left side of the display during boot step 1. During upgrade, display of upgrade info like "R250.01.002.1 ->		
Device auto-discovery (OpenTouch)		R250.01.003.1" on the top left side of the display. When the end user first connects the device, he/she is asked to provide login information. The DM server automatically creates DM configuration files for the device according to the login information and links the device phone number to the hardware (MAC) device.		

	п				
Feature Description	Delivered	Comments			
		[Restriction] This feature works provided that the internal flash memory contains R250 1.008.4 or newer version.			
Applications					
		Choice between "standard" and "preview" modes.			
Homepage		[Restriction] After reboot, the homepage is always back in "standard" mode. If need be, the user must switch back to "preview" mode.			
Contacts: local directory (filled out by user)		[Info] The maximum number of Contacts is limited by the setting DirMaxContact which is by default set to 500 for OT. It is possible to modify DirMaxContact: Settings > Admin (+ enter password) > Application > Address book > Maximum contact number for directory. 0 < Value ≤ 1000 [Info] CLI: if last name is not available when creating a new contact from			
		the Call History, contact is filled with the phone number.			
Favorites		Subset of Contacts list			
Question Mark Information Screen		[Info] If there is a wrong manipulation on the phone, there will be a black screen and a popup window with a question mark icon displayed on the screen indicating the reason of the issue.			
Search by name		[Restriction] When search by firstname is used, some contacts may be missing if long list of users is returned. [Restriction] Sometimes the picture from external LDAP is not retrieved. [Restriction] When searching a contact name with accent, the contact may not be retrieved.			
		See also "Redial from Call History or Contacts".			
Call history		Call log is splitted in two lists: 'New' and 'History'. As soon as 'New' list is opened and closed, all listed calls switch to 'Historic' list. [Restriction] When an external call is transferred from set A to set B, then			
		set A number is displayed on set B instead of the external number.			
		Possibility to create/modify/delete/move contacts keys, to move default keys, to reset keys configuration.			
Programmable keys / speed dial keys		[Info] Available only in homepage "standard" mode. [Info] To enable the programmable keys, the configuration file has to be set manually by adding the following setting: <setting id="EnableWebappProgkeys" override="true" value="true"></setting> You also need to set the 'override' attribute to false for the HomepageKeys setting.			
Auto-answer / receive 3rd party call for remote control by softphone (only OpenTouch)		"Click to answer" When a user receives a call, his/her 8082 My IC Phone rings and displays the call. An "answer call" button appears on the OTC client. The user clicks on this button to answer the call and the 8082 My IC Phone takes the call.			
Settings (user, device)					
Phone Settings		[Restriction] Entries in Admin Settings for eMail, Chat, Save Restore are displayed in the list of the phone settings but cannot be used because these applications are not available yet.			

Feature Description	Delivered	Comments				
Settings (USB,		[Info] User can't access Bluetooth® configuration during step 2 of the				
Bluetooth®, etc)		phone reboot. He/she needs to wait until step 5 (last initialization step).				
Customization of the GUI		User can change the skin using a list of skins defined in the user's settings. The change of skin occurs without reboot. Duration to change the skin is about 35s.				
		[Info] In advanced homepage mode, up to 3 previews are allowed. See also "Programmable keys / speed dial keys".				
Wake up		Local application				
Screensaver mode		[Info] The screensaver mode is entered after the time configured in the settings. It can be disabled using the settings parameters.				
Magnifying glass		For visually impaired people.				
Dynamic virtual assistant (DVA) (only OpenTouch)		[Info] This feature is valid for OT only. It allows the callee to deflect an incoming call to a virtual assistant which allows caller to notify a urgent call to the caller or post a message in his/her voicemail.				
Bluetooth® pairing		,				
API for external		[Info] Only use of certified applications from AAPP website is supported.				
application		Certified applications have <u>IWR</u> available.				
Graphical User Interface (GUI) in 29 languages		[Info] Some rare labels translations are still missing.				
Lock / unlock / autolock						
		[Info] Only support of audio files (mp3, aac) and picture files (jpg/jpeg, png, bmp) on a USB memory stick connected to a USB port of 8082 My IC Phone.[Info] Only support of FAT16/32 filesystem on USB memory stick (32GBytes max). Only first FAT partition is used.				
		[Info] The audio and picture files to be scanned must be located in a specific folder of the USB memory stick. This folder must be set in Settings > Application > My files > UsbRootDirectory. Default value is /My IC Phone				
		[Info] For best phone performance the recommended picture size for local avatar picture is 100x100 pixels (30 kbytes). Recommended picture size for background and screensaver picture is 800x480 pixels (100 kbytes).				
Media file manager		[Info] Avatar picture is only used locally on the phone and is not transferred to the distant callee.				
		[Info] Only pictures of the User Space can be used for Screensaver. Pictures located on the USB stick need to be copied on the phone before being set in the screensaver.				
		[Restriction] File manager scans UsbRootDirectory folder (see info above) and handles only the first 200 files (whatever format, audio or picture or else) as a flat list in alphabetical order. Only audio and picture files that are included in the first 200 files are taken into account by the set.				
		[Restriction] Files on USB memory stick are not detected if USB memory stick is plugged before power up of 8082 My IC Phone.				
		[Restriction] Audio files cannot be copied on the terminal.				

Feature Description	Delivered	Comments
	Deli	
		[Restriction] It is not possible to copy files from the terminal to the USB memory stick.
		[Restriction] It is not possible to use 8082 My IC Phone to remove files from the USB memory stick.
Telephony Presence (only OpenTouch)		
		[Info] The feature is valid for up to three managers linked to one assistant (3:1)
		[Info] Manager has no possibility to enter directly a call number in his/her white list. A contact card must be created before adding it in the white list.
		[Info] It is recommended to create entries in the white list from contacts with names, as contacts with number only would not be displayed in case of performing a search.
		[Info] Two key presses are required to pickup a monitored call: press on monitored call notification, answer call.
		[Info] It is recommended that Assistant does not use routing and overflow because Manager is not aware of these configurations. Manager is not aware of Assistant's absence either.
		[Info] It is recommended that Assistant has a sufficient number of lines to be available for the Manager. Consequently setting "SIPMaxCall" should be ≥3 and setting "ConsiderBusyIfOneLine" should not be set.
Manager / Assistant 3:1 (OpenTouch)		[Info] Manager and Assistant must not hide their identity and keep the default identity setting (Settings > Application > Telephony > Hide identity = no).
		[Info] There is no presence information in the conversation screen. Therefore it is necessary to return to the homepage to get the presence status of the Manager (for the Assistant) or the Assistant (for the Manager).
		[Info] Multi-device: after getting control of the call, Manager or Assistant cannot use the Multi-device feature to switch their telephony device.
		[Info] Call notification is visual and audible. The audible method is made up of 3 beeps. Some users might consider that these beeps are not very loud.
		[Info] Manager/Assistant feature is not operational when 8082 My IC Phone is in " <u>Survivability mode</u> ".
		[Restriction] Manager: when Manager is activated, routing profile is deactivated. If manager mode is deactivated, it is necessary to re-activate routing profile manually. If manager activates a forward, delegation mode is cancelled.
		[Restriction] Call log may be inconsistent.

Feature Description	Delivered	Comments		
		[Restriction] Intruding is not supported.		
		[Restriction] When three managers are linked to the attendant, the manager list needs to be scroll down to fully display 3 rd manager name.		
		[Restriction] If Manager/Assistant link is activated and then the 8082 My IC Phone reboots, then telephonic presence does not work. [Restriction] In some cases, messages are left to assistant's voice mail instead of manager's voice mail.		
		[Info] The feature is valid for one manager linked to one assistant (1:1). Only manager's set is 8082 My IC Phone. Assistant's is an IP Touch.		
		[Info] It is recommended that Assistant does not use routing and overflow because Manager is not aware of these configurations.		
		[Info] Manager must not hide his/her identity and keep the default identity setting (Settings > Application > Telephony > Hide identity = no).		
		[Info] Manager/Assistant feature is not operational when 8082 My IC Phone is in " <u>Survivability mode</u> ".		
		[Restriction] No white list.		
Manager / Assistant 1:1		[Restriction] No telephony presence.		
(OXO)		[Restriction] No "Manager monitors the calls and Assistant receives them" mode.		
		[Restriction] Manager: when Manager is activated, routing profile is deactivated. If manager mode is deactivated, it is necessary to re-activate routing profile manually. If manager activates a forward, delegation mode is cancelled.		
		[Restriction] Call log may be inconsistent.		
		[Restriction] Intruding is not supported.		
		[Restriction] In some cases, messages are left to assistant's voice mail instead of manager's voice mail.		
Supervision and call pick-		[Info] Maximum number of supervised users is 10.		
up (only OpenTouch)		[Info] Each supervisor or supervised user can belong to only one group.		
Other certified applications		[Info] Certified applications are available in <u>IWR</u> section of the Enterprise Business Portal (Customer Support > Technical Support > Application Partner Interworking Reports > Products > OmniTouch My IC Phone)		
User Manual		[Info] 29 languages in pdf format.		

8 8082 My IC Phone settings

Column "default value" is the value assigned to the setting at power up of the phone. Note that default values in following tables may be overridden by other values coming from the call server centralized DM (Device Management) when the DM sends its configuration files to 8082 My IC Phone during the initialization phase of the phone.

8.1 List of settings which request a phone reset to be taken into account

name	default value	category	description
AudioPayloadTypes	101;96;117	Device	dtmf pt;red pt;amr pt
ComLogVoiceMailPollingTimeout	0	Application	Disable/enable voice mail polling period
CurrentAdmcfgTimeZone	Universal	Device	current TZ env. variable
CurrentDemoMode	false	Device	If this setting is set to 'true', the phone set will boot
			into demo mode
CurrentDemoType	idle	Device	If demo mode is enable, this setting shows the
			demo type
CurrentEnetcfgDhcpMode	Dynamic	Network	Current DHCP client Mode Status
CurrentEnetcfgDhcpUserClass	ictouch.class0	Network	This setting contains the value of 'user class' option
	6.1	N	to be sent to DHCP server
CurrentEnetcfgDhcpUserClassEnable	false	Network	'user class' option for DHCP enabled/disabled
CurrentEnetcfgDmBackupUrl		Network	Backup DM server url
CurrentEnetcfgDmUrl	0.000	Network	DM server url
CurrentEnetcfgDns1	0.0.0.0	Network	First DNS Server
CurrentEnetcfgDns2	0.0.0.0	Network	Second DNS Server
CurrentEnetcfgDns3	0.0.0.0	Network	Third DNS Server
CurrentEnetcfgDomain		Network	Domain ex:alcatel-lucent.com
CurrentEnetcfgInterface	eth0	Network	Network Interface Name
CurrentEnetcfglpaddr	0.0.0.0	Network	IP address
CurrentEnetcfgMacaddr	00:00:00:00:00:		MAC address
CurrentEnetcfgRouter	0.0.0.0	Network	Default Gateway
CurrentEnetcfgSntpSyncStatus	NO	Device	Indicates if system clock is updated with the SNTP
			server. This value is updated every
			SntpRefreshPeriod
CurrentEnetcfgSubnet	255.255.25 5	Network	Subnet mask
CurrentEnetcfgVlan	4095	Network	If Vlan is enable, this setting contains vlan number
CurrentEthlcfgLanAuto	true	Network	LAN interface auto negociation mode
			enable/disable
CurrentEthlcfgLanDuplex	Full	Network	LAN interface duplex mode (full/half)
CurrentEthlcfgLanSpeed	100	Network	LAN interface Speed
CurrentEthlcfgPcAuto	true	Network	PC interface auto negociation mode enable/disable
CurrentEthlcfgPcDuplex	Full	Network	PC interface duplex mode (full/half)
CurrentEthlcfgPcSpeed	100	Network	PC interface Speed
CurrentLldpcfgAssetid		Network	Custom ID set by DM. By default this setting
			contains the mac address
CurrentLldpcfgCivicAddressLci		Network	Civic address localisation Value
CurrentLldpcfgCoordinateBasedLocation		Network	Coordinate based localisation Value
CurrentLldpcfgEcsElin		Network	ECS ELIN format localisation Value
CurrentLldpcfgPowerAccepted	false	Network	If the switch accepts to provide the requested
			power value this setting is set to 'true'
CurrentLldpcfgPowerPriority	2	Network	Power priority (level) requested by ICTouch to the switch

8.2 List of settings which do not request a phone reset to be taken into account

name	default value	category	description
ActionButtonInDialpad	0	Application	Action button in Alphanum Keyboard
ActiveRouting	-	Application	The configuration of the active routing, if any
AgendaAlarmContext	LOCAL	Application	Local wake-up is triggered by the phone itself. Remote wake-up is triggered by OXE through
			SEPLOS
AgendaAlarmDurationOff	5	Application	Idle duration between two alarms bursts
AgendaAlarmDurationOn	1	Application	Alarm ringing duration
AgendaAlarmOccurrences	3	Application	Number of alarm triggers for one user programming (when the user doesn't stop it)
AgendaDefaultAppointments		Application	Init appointments on start-up
AgendaMaxNumberAppointments	200	Application	The maximum number of appointments that the user can create.
AgendaNotificationDelay	15	Application	Delay between start of notification and real event
AllowDirectCustomForward	true	Device	Enable or disable the custom forward possibility
ApplicativeServerUrl		Network	Url of non ICS applicative server
Audio8021p	5	Device	PRIORITY: Audio 802.1p priority
AudioAccessoryEnableDevice	1	Device	Enable JACK/USB/BT accessory device
AudioAMRBitRate	2	Device	The rate of AMR WB codec(Preferred rate for the caller when initiating an outgoing call)
AudioBeamformingHandsfreeEnhanceme nt	false	Device	Beamforming handsfree enahancement or not
AudioBreathReduction	false	Device	Breath reduction or not
AudioBtDeviceType	1	Device	Configure the BT device as headset, handsfree or loudspeaker
AudioBusyTone	1;400;0;0;0;296 3;0;0;0;0;0;2;1 ;1;1;375;0;0;0; 375;0;0;0;0;0;0; 0;0;0;0;0;0;0;0; 0;0;0;0;	Device	User-defined busy tone data (8 states)
AudioCHoldTone	2;420;335;0;0;2 963;2963;0;0;0; 0;4;1;1;3;200;0 ;2;0;200;1;3;3; 200;0;0;0;0;0;0;0 0;0;0;0;0;0;0;0;0 0;0;0;0;0;0;0;0;0	Device	User-defined call hold tone data (8 states)
AudioCWaitTone	1;400;0;0;0;296 3;0;0;0;0;0;2;1 ;1;1;200;0;0;0; 5000;0;0;0;0;0;0; 0;0;0;0;0;0;		User-defined call waiting tone data (8 states)
AudioDialTone	2;350;440;0;0;2 963;2963;0;0;0; 0;1;33;0;3;0;0; 0;0;0;0;0;0;0;0;0;0; 0;0;0;0;	Device	User-defined dial tone data (8 states)
Audiodiffserv	46	Device	TOS/Diffserv:Field to be included in the IP headers of the RTP/RTCP packets
AudioDtmfDuration	0	Device	Dtmf Duration
AudioDtmfFeedbackEnable	true	Device	Enable/disable DTMF feedback
AudioDtmfLevel	0	Device	bias value of DTMF tone level

AudioHandsetVolume	2	Device	Handset volume level
AudioHeadsetVolume	3	Device	Headset volume level
AudioHearingAidEnable	false	Device	Enable/disable Hearing Aid
AudioJackDeviceType	1	Device	Configure the JACK device as headset, handsfree or loudspeaker
AudioNoiseReduction	false	Device	Noise reduction or not
AudioPacketTime	20;20;20;20;20	Device	Packet time
AudioRingAppointment		Device	List of available appointment ring melodies (TEXT_CHOICE format)
AudioRingAppointmentChoice	/usr/share/ring data/ring12.mp 3	Device	Configure apppointment ring melody
AudioRingBeep	0	Device	Configure ring beep
AudioRingExternal		Device	List of available external ring melodies (TEXT_CHOICE format)
AudioRingExternalChoice	/usr/share/ring data/ring18.mp 3	Device	Configure external ring melody
AudioRingInternal		Device	List of available internal ring melodies (TEXT_CHOICE format)
AudioRingInternalChoice	/usr/share/ring data/ring18.mp 3	Device	Configure internal ring melody
AudioRingLock	false	Device	Lock/Unlock ring control to user
AudioRingProgressive	false	Device	Configure ring progressive
AudioRingSilent	false	Device	Enable/disable ring silent
AudioRingSpecial		Device	List of available special ring melodies (TEXT_CHOICE format)
AudioRingSpecialChoice	/usr/share/ring data/ring18.mp 3	Device	Configure special ring melody
AudioRingTone	1;400;0;0;0;402 9;0;0;0;0;0;4;1 ;1;1;400;0;2;0; 200;1;3;1;400;0 ;0;0;2000;0;0;0 ;0;0;0;0;0;0;0;0;0 0;0;0;0;	Device	User-defined ringback tone data (8 states)
AudioRingVolume	5	Device	Ring volume level
AudioRj9Device	0	Device	The RJ9 device is configured as handset or as headset
AudioRlrHandset	0	Device	Handset RLR bias for tuning
AudioSidetoneHandset	0	Device	Handset sidetone bias for tuning
AudioSlrHandset	0	Device	Handset SLR bias for tuning
AudioSpeakerPhoneVolume	5	Device	Speakerphone volume level
AudioToneCountry	0	Device	country standard for call progress tone
AudioUsbDeviceType	1	Device	Configure the USB device as headset, handsfree or loudspeaker
AudioUseCustomTone	false	Device	Enable to use the 5 tones defined in the setting
AudioVad	false	Device	Enable/disable audio VAD(Voice Activity Detection)
AudioVoiceSignalLimitation	false	Device	Voice signal limitation or not
AutoLock	false	Application	
BacklightDelay	120	Application	Delay before the backlight becomes inactive
BackToHomepageAtEndCall	true	Application	set to true to go to homepage after a call
BeepEnabled	false	Device	Enable low level beep feedback
BTHandseDfuVer	0	Device	bluetooth handset firmware version
BTHandset	false	Device	bluetooth handset
BTHandsetAircoding	0	Device	bluetooth handset aircoding type
BTHandsetBdAddr	00:00:00:00:00: 00	Device	bluetooth handset bdaddr
BTHandsetCod	0	Device	bluetooth handset cod
BTHandsetCodec	1	Device	BTH codec selection
BTHandsetEscoSupported	false	Device	bluetooth handset supports esco or not

ContactFirstNameOrder	1	Device	List the available orders of the First and Last Names
			of the contacts, with the selected one in the

			jsvalue
ContactMaxAdresses	3	Application	
CurrentAdmcfgCfgfilePollingEnable	false	Device	Enable/disable configuration update process polling
CurrentAdmcfgCfgfilePollingTimeout	86400	Device	Configuration update process polling period (in Sec)
CurrentAdmcfgDateTime		Device	Date/Time. format: 'YYYY-MM-DD HH:MM'
CurrentAdmcfgUpdatePollingEnable	false	Device	Enable/disable software update process polling
CurrentAdmcfgUpdatePollingTimeout	86400	Device	Software update process polling period (in Sec)
CurrentAdmcfgUpdateTimeDelta	0	Device	Maximum random delay to start update process
			checks
CurrentAdmcfgUpdateTimeEnable	false	Device	Enable/disable software update process checks
CurrentAdmcfgUpdateTimeStart	00:00	Device	Start time for update process checks
CurrentEnetcfgSntp	0.0.0.0	Network	SNTP Server
CurrentEnetcfgSntpRefreshPeriod	3600	Network	time (in Sec) between two SNTP synchronization actions
CurrentFabHwVersion		Device	Hardware revision version
CurrentFabPcms		Device	PCMS
CurrentFabPhoneModel	UNKNOWN	Device	Device Model (VHE/LE/MR)
CurrentFabSerialNumber	ONNIN	Device	Device Serial Number
CurrentFabSwVersion		Device	Manufacturer software version
CurrentSoftwareDate		Device	ALU Software production date
CurrentSoftwareVersion		Device	ALU Software production date ALU Software version
DateFormat	0	Device	List the available formats of date, with the selected
	U		one in the jsvalue
DdiNumberPattern		Application	Define the DDI number patter used to compute the DDI number
DDIRange		Application	This setting is used for checking if the Guest has a
D-flth-ti		A	DDI number or not
DefaultActions DefaultActions	0	Application	List the social black of the social s
Defaultkeyboard	0	Device	List the available keyboards types, as well as the current one in the jsvalue
DefaultKeys		Application	
DestCharSet	utf-8	Application	Local Charset for inbound conversion and sendings
DhcpEnetcfgDm		Network	DM Server. This setting is set through DHCP
DhcpEnetcfgDmBackup		Network	Backup DM Server used if main DM fails. This setting is set through DHCP
DhcpEnetcfgDmBackupConfigPath		Network	This setting is set through DHCP
DhcpEnetcfgDmConfigPath		Network	This setting is set through DHCP
DhcpEnetcfgDmUrl		Network	DM server url
DhcpEnetcfgDns1		Network	First DNS Server
DhcpEnetcfgDns2		Network	Second DNS Server
DhcpEnetcfgDns3		Network	Third DNS Server
DhcpEnetcfgDomain		Network	Domain ex:alcatel-lucent.com
DhcpEnetcfglpaddr		Network	IP address
DhcpEnetcfgRouter		Network	Default Gateway
DhcpEnetcfgSntp		Network	SNTP Server
DhcpEnetcfgSubnet		Network	Subnet mask
DialingRuleAreaCode		Application	Area code
DialingRuleAreaCodeSave		Application	Saving value of DialingRuleAreaCode for detecting
Dialia «Dula Cara da Cal	FD	A 1	change
DialingRuleCountryCode	FR	Application	ISO 3166 country code (Alpha-2)
DialingRuleCountryCodeSave	EN	Application	Saving value of DialingRuleCountryCode for detecting change
DialingRuleExternalPrefix	0	Application	Specify the prefix to use to make an external call
DialingRuleExternalPrefixExceptions		Application	Specify the list of exceptions when adding the external prefix
DialingRuleExternalPrefixExceptionsSav e		Application	Saving value of DialingRuleExternalPrefixException for detecting change
	1	1	Saving value of DialingRuleExternalPrefix for
DialingRuleExternalPrefixSave	0	Application	
	6	Application Application	detecting change Specify the phone number length from which we
DialingRuleExternalPrefixSave			detecting change

1	1	I	detecting change
DialingToneEnabled	false	Application	defines if dialing tone should be heard or not during
3			dialing phases.
DirectoryDefaultContacts		Application	
DirMaxContact	500	Application	
DirMaxWordSearch	3	Application	
DisplayedInfoCheckin	1	Application	Configuration of the label to display on the topbar in hotel mode, when the room is in checkin state
DisplayedInfoCheckout	1	Application	Configuration of the label to display on the topbar in hotel mode, when the room is in checkout state
DisplayedNameCheckout	1	Application	This setting defines the information that have to be displayed on the first line of user-info area when the phone is in checkout state.
DmAdmcfgCfgfilePollingEnable	false	Device	Enable/disable configuration update process polling
DmAdmcfgCfgfilePollingTimeout	86400	Device	Configuration update process polling period (in Sec)
DmAdmcfgInventoryUrl		Device	Url into which the inventory file will be put
DmAdmcfgUpdatePollingEnable	false	Device	Enable/disable software update process polling
DmAdmcfgUpdatePollingTimeout	86400	Device	Software update process polling period (in Sec)
DmAdmcfgUpdateTimeDelta	0	Device	Maximum random delay to start update process checks
DmAdmcfgUpdateTimeEnable	false	Device	Enable/disable software update process checks
DmAdmcfgUpdateTimeStart	00:00	Device	Start time for update process checks
DmAdminPasswd		Security	used to set password for the user 'admin'
DmCtlFile		Security	Path of the CTL file on the DM. Set by DM
DmCtlHash		Security	MD5 hash of the CTL file on the DM\nhello
DmCtlSigningMacaddr		Security	Mac address of the terminal that have signed the CTL file. Set by DM
DmEnetcfgSntp	0.0.0.0	Network	SNTP Server
DmEnetcfgSntpRefreshPeriod	3600	Network	time (in Sec) between two SNTP synchronization
	3600		actions
DmEnetcfgUpgrade		admin	Upgrade Process enable/disable
DmEnetcfgUpgradeFile		admin	Url of the profile file
DmSecucfgSsh	false	Security	Enable ssh connections
DndRequiresPassword	false	Application	Dnd activation requires a password
DoNotDisturb	false	Device	Activate / deactivate the 'Do Not Disturb' state
DTMFPattern	\$DTMF\$	Application	define the DTMF pattern of a number
EmailAccount		Application	For use against SMTP server
eMailDefaultFilter	all	Application	Default filter for GUI
eMailDefaultSort	By Sender	Application	Default sort for GUI
EmailEnabled	false	Application	
EmailLogin		Application	For use against IMAP or POP3 server
eMailMaxAttSize	1000000	Application	Max accepted attachment size in bytes
eMailMaxLocalNumber	100	Application	Maximum number of eMails accepted on local storage
EmailPassword		Application	
eMailReceiptInterval	1	Application	Nb of minutes between each batch receipt
eMailType	POP3	Application	Default server protocol
Emergencylcon1	sdk-emergency	Device	Icon used for the Emergency Button 1
Emergencylcon2	sdk-emergency	Device	Icon used for the Emergency Button 2
Emergencylcon3	sdk-emergency	Device	Icon used for the Emergency Button 3
