1 Overview

8082 My IC Phone is a high end terminal intended for use in Hotel mode when connected to OmniPCX Enterprise or in Business mode when connected to OmniPCX Office or OpenTouch. The terminal (hardware/software) is the same for both modes but the list of supported features is different.

This document is the Technical Release Note for 8082 My IC Phone R260 in Business mode, software branch 1.012.x:

- version 1.012.5 (and more recent as support versions) for OmniPCX Office R9.0/R9.1 and OpenTouch R1.2/R1.3.

The new features of version 1.012.5 vs. version 1.012.3 are:

- release of My IC Customizer R2.1.x
- bugs fixing (see section 7)

The new features of version 1.012.3 vs. version 1.012.2 are:

- minor bugs fixing

The new features of version 1.012.2 vs. version 1.012.1 are:

- bugs fixing (see section 7)
- on OpenTouch: change system password on 8082 My IC Phone

The new features of version 1.012.1 vs. version 1.012.0 are:

- minor bugs fixing

The new features of version 1.012.0 vs. version 1.011.x are:

- minor bugs fixing (see section 7)

Note

This software version is compatible with both HW-1 (3MG27001AA) and HW-2 (3MG27036AA) versions. However video capabilities are available only on HW-2 version.

2 Software version download

2.1 OmniPCX Office (OXO)

2.1.1 Download

Software of 8082 My IC Phone is embedded in the global OmniPCX Office call server software (higher or equal to OmniPCX Office R9.0). Support versions of 8082 My IC Phone software are delivered in support versions of OmniPCX Office (higher or equal to R9.0).

Several details related to the deployment of 8082 My IC Phone in OXO environment can be found in reference TC1729.

OXO release	8082 My IC Phone SW version
R900/033.002	R260/1.009.2
R900/037.002	R260/1.010.3
R900/040.002 to 042.001	R260/1.010.4
R900/048.001 and R910/021.001	R260/1.011.0
R900/052.002	R260/1.012.0
R900/053.001 to 054.001	R260/1.012.1
R910/035.001 to 042.001	R260/1.012.3

2.1.2 Collecting logs and information

In case a technical support ticket is created, it is advised to collect logs and information to send with the ticket.

getmyicphonelogs.zip file is available on the Enterprise Business Portal next to the software to help Business Partners to proceed. This file contains:

- readme.txt file
- getmyicphonelogs.txt file

In order to help pass through the security checks like anti-virus, getmyicphonelogs file has been zipped. After download, unzip it and rename 'getmyicphonelogs.txt' file in 'getmyicphonelogs.sh'.

This script collects information and logs on 8082 My IC Phone. More information is available in readme.txt file.

2.2 OpenTouch (OT)

2.2.1 Download

Software of 8082 My IC Phone must be downloaded from the Enterprise Business Portal:
<https://businessportal.alcatel-lucent.com>

When connected on the Business Portal, it is available at location:

Customer Support > Technical Support > Software Download >
OpenTouch Business Edition & Multimedia Services > Release 1.2 or 1.3 > software my ic phone

Several details related to the deployment of 8082 My IC Phone in OT environment can be found in reference TC1755.

At that location you will also find:

- the My IC Phone Synchronizer application which enables synchronization between Microsoft® Outlook application address book and the contacts database of 8082 My IC Phone
- the Technical release Note for My IC Phone Synchronizer.

OT Release	8082 My IC Phone SW version
R1.2.000.054	R260/1.011.x
R1.2.000.055, R1.3.000.043, R1.3.000.052, R1.3.000.061	R260/1.012.x

2.2.2 Collecting logs and information

In case a technical support ticket is created, it is advised to collect logs and information to send with the ticket.

getmyicphonelogs.zip file is available on the Enterprise Business Portal next to the software to help Business Partners to proceed. This file contains:

- readme.txt file
- getmyicphonelogs.txt file

In order to help pass through the security checks like anti-virus, getmyicphonelogs file has been zipped. After download, unzip it and rename 'getmyicphonelogs.txt' file in 'getmyicphonelogs.sh'.

This script collects information and logs on 8082 My IC Phone. More information is available in readme.txt file.

2.2.3 Hints for upgrade

Note 1

Upgrade duration can take up to 45 minutes, particularly for "out-of-the-box" installation.

Note 2

With OpenTouch ecosystem, in case of trouble to upgrade the 8082 My IC Phone from its current version to R260 version:

- check that the current software version is at least R200 1.027.2
- if not, then first upgrade the 8082 My IC Phone from its current version to R200 1.034.4 version, then you can upgrade to R260 version.

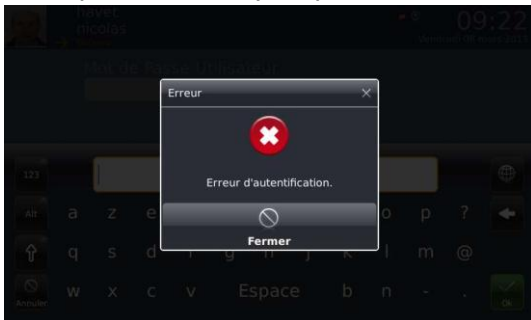

With OmniPCX Office ecosystem, in case of trouble to upgrade the 8082 My IC Phone from its current version to R260 version:

- if possible, check that the current software version is at least R200 1.027.2
- if not, then first upgrade OXO software to R820 release, then you can upgrade the 8082 My IC Phone to R260 version.

Note 3

When upgrading from R260 1.010.4 (or less) to R260 1.011.0 (or more), or when upgrading from R250 1.010.3 (or less, or R200) to R260 1.011.0 (or more), then the very first time (and only the very first time), "authentication error" message is popping-up and you are required to enter your password.

This is due to the improvement of security features.

3 Related Documents

Following documents can be accessed from the Enterprise Business Portal:
<https://businessportal.alcatel-lucent.com>

From the home page of the Business Portal, in the "Quick access" area, click the link to enter the Technical Documentation Library tool.

3.1 Technical Communications (TC) – Troubleshooting Guides (TG)

In the Technical Documentation Library, select the "Latest Technical Communications" in the vertical menu on the left side.

In the new page, enter the TC or TG reference (ex. TG0065) in the "Search by number (TCxxxx or TGxxxx)" field and click return to get access to the document.

My IC Customizer	TC1751	Not supported	TC1751
External applications	Supported (only certified applications with existing IWR)	Supported (only certified applications with existing IWR)	Supported (only certified applications with existing IWR)

3.2 User Manual

In the Technical Documentation Library, select the Product "OpenTouch Business Edition" or "OmniPCX Office", and the concerned release, in the vertical menu on the left side.

Then click "Search" to open the Search page:

- In the Reference Book section click "Unselect all" then click the tipboxes "User Manuals" and "User Guides"
- In the "Keywords" field enter the string "8082"
- Then click "Launch the search" to access the document.

The following table gives the reference of the User Manuals in English language (US reference) for the different 8082 My IC Phone releases and Call Server ecosystems.

SW version	in OXO ecosystem	in OT ecosystem
R200	8AL 90835 USBB	8AL 90835 USCC
R250	N/A	8AL 90835 USCD
R260	8AL 90835 USBC	8AL 90835 USCE

Note

There is no User Manual for the Hotel mode (OXE ecosystem).

Available languages are:

US	English	FR	French	DE	German
ES	Spanish	IT	Italian	PT	Portuguese
TR	Turkish	NL	Dutch	HU	Hungarian
NV	Norwegian	SV	Swedish	DK	Danish
EL	Greek	CS	Czech	PL	Polish
KO	Korean	FI	Finnish	TE	Estonian
LT	Lithuanian	LV	Latvian	SK	Slovak
SL	Slovenian	JA	Japanese	IS	Icelandic
AR	Arabic	HE	Hebrew	RU	Russian
CN	Chinese	TW	Taiwanese		

3.3 Technical Documentation

In the Technical Documentation Library, select in the vertical menu at the left:

- product “OmniPCX Office” and the concerned release to get information about operation of 8082 My IC Phone in OXO ecosystem
- product “OpenTouch Business Edition” and the concerned release to get information about operation of 8082 My IC Phone in OpenTouch ecosystem

4 Technical Support

Technical support will be provided to OXO ACSE-certified or OpenTouch ACSE-certified.

Before submitting a Service Request, make sure that:

- In case a Third-Party application is involved, that application has been certified via the AAPP
- You have read through the Release Notes which lists new features available, system requirements, restrictions etc. available in the Technical Documentation Library
- You have read through the Troubleshooting Guides and Technical Bulletins relative to this subject available in the the Technical Documentation Library
- You have read through the self-service information on commonly asked support questions, known issues and workarounds available in the Technical Knowledge Center

Note

Certification programs are available on the Business Portal at location:

Training and Certification > Training Catalog > Training catalog by job function > Postsales

See Postsales training offer documents:

- Postsales OpenTouch Suite for SMB_2013 Q4
 - Postsales_OV8770 Training Offer
 - Postsales_OpenTouch Training Offer

5 Glossary

AAPP	Alcatel-Lucent Application Partner Program
ACS	Advanced Communications Server
ALE	Alcatel-Lucent Enterprise
AMDS	Automated Message Delivery System
BP	Business Partner
CAS	Channel Associated Signalling
CCS	Common Channel Signalling
CTI	Computer Telephony Integration
DECT	Digital Enhanced Cordless Telecommunications
DHCP	Dynamic Host Control Protocol
DM	Device Manager (integrated in OXO, part of OmniVista 8770 for OT)
DTD	Document Type Definition
DTMF	Dual Tone Multi Frequency
FW	Firmware
GUI	Graphical User Interface
HD	High Definition
http/https	Hyper-Text Transfer Protocol / Hyper-Text Transfer Protocol Secured
HW	Hardware
ICS	Instant Communications Suite
IMAP	Internet Message Access Protocol
IP	Internet Protocol
IVR	Interactive Voice Response
IWR	InterWorking Report (test result document managed by AAPP to prove interoperability with external applications), available in the Enterprise Business Portal (Customer Support > Technical Support > Application Partner Interworking Reports)
LAN	Local Area Network
LDAP/LDAPS	Lightweight Directory Access Protocol
M/A	Manager/Assistant
MMI	Man-Machine Interface
MWI	Message Waiting Indicator
N/A	Not Available
NL	No Limit
NR	Not Relevant
OMC	Office Management Console (PC application for OXO configuration)
OT	OpenTouch

OT 8400 ICS	OmniTouch 8400 Instant Communications Suite
OTBE	OpenTouch Business Edition
OTBEH	OpenTouch Business Edition Hosted
OTC	OpenTouch Conversation
OTMS	OpenTouch Multimedia Services
OS	Operating System
OXE	OmniPCX Enterprise Communication Server
OXO	OmniPCX Office Communication Server
PC	Personal Computer
PCS	Passive Call Server
PiP	Picture in Picture
PoE	Power over Ethernet
PSTN	Public Switched Telephone Network
QoS	Quality of Service
RFC	Request For Comments
RTCP	Real Time Control Protocol
RTP	Real Time Protocol
SDK	Software Development Kit
SIP	Session Initiation Protocol
SMS	Short Message Service
SSL	Socket Secure Layer
Survivability mode	Operating mode of 8082 My IC Phone when connection to OT SIP Server is lost and backup connection is provided by OXE and/or PCS SIP Server. This mode is valid for OT ecosystem only (OXO ecosystem has no backup Server).
SW	Software
TOS	Type Of Service
TSE	Terminal Server
TUI	Telephone User Interface (see Voice access)
UA	Universal Alcatel-Lucent
UC	Unified Communications
UDA	Unified Directory Access
UI	User Interface
UM	User Manual
USB	Universal Serial Bus
VM	Voice Mail
VoIP	Voice over IP
Voice access (TUI)	Feature is accessible from a telephone (Telephone User Interface with DTMF)
VPN	Virtual Private Network

VxML	Voice Extensible Markup Language
Webapp	Web Application. Generic name used to designate any application running on 8082 My IC Phone and providing interaction with the end user (for example the application managing communications which presents telephony features of the 8082 My IC Phone is a webapp, the application configuring alarms is a webapp, etc). There are two types of webapps: a native webapp is designed by ALE and integrated in the main software distribution. An external or third party webapp is designed, built and distributed by external developers in accordance with SDK and certification process.
WS	Web Services
XML	Extensible Markup Language

6 List of the features of 8082 My IC Phone

How to read the table:

Meaning of the color in the « Delivered » column	
	Feature supported without known restriction [Info] is used to highlight useful information about how to install, configure or use the feature
	[Restriction]feature supported but with some restriction
	Feature not available or not supported

Feature Description	Delivered	Comments
Hardware capabilities		
Color Display 800 x 480		Color display with backlight. [Info] Display switches to screensaver mode after a programmable timeout.
External audio jack connector 3.5mm		Connection of a headset or a meeting room module (loudspeaker or handsfree module).
2-port USB 1.1/2.0		Only connection of memory stick and/or headset. [Info] USB connectors are not intended for the powering of USB accessories (except memory sticks or headsets) and this use is not supported in case of malfunction. Total output current for USB connectors is 600 mA (3 W). Example: if 500 mA are drawn from one USB port to power a standard device, then only 100 mA are available for the second USB port for a low power device.
2-port Ethernet		Ethernet 10/100/1000 Mbps for connection to the LAN (LAN port) and to a PC (PC port). [Info] LAN port is PoE 802.3af compliant. 8082 My IC Phone is Class 3 PD (Powered Device consuming not more than 12.95 W). More information about PoE here.
Touchscreen		Touchscreen for interaction of the terminal with the end user. [Info] To clean up the screen, use a lint-free, soft cloth. It may be very slightly dampened by water.

Feature Description	Delivered	Comments
Haptic (tactile) feedback		<p>Haptic (tactile) feedback is the mechanical feedback (vibration) provided by the touchscreen to improve interaction with the end user.</p> <p>[Info] The haptic (tactile) feedback is only active when pressing alphabetic keys or dialpad keys.</p> <p>[Info] At first initialization of the phone the haptic (tactile) feedback is deactivated. To enable haptic (tactile) feedback go to : Settings > Device > Phone Configuration</p>
Bluetooth® handset		<p>Connection of the Bluetooth® handset or a Bluetooth® headset.</p> <p>[Info] The Bluetooth® handset is already paired to the terminal at the factory.</p> <p>[Info] Bluetooth® handset software is embedded in the 8082 My IC Phone software package. Automatic Bluetooth® handset software upgrade is done while 8082 My IC Phone is upgrading.</p> <p>[Info] When battery is completely discharged, full battery charge is reached after 16 hours of charge on the cradle.</p> <p>[Info] When battery is fully charged: - talk time is 10 hours - standby time is 60 hours (handset removed from cradle and in idle mode).</p> <p>[Info] MAC address of the Bluetooth® handset is printed on the label behind the battery. When Bluetooth® handset is paired to the 8082 My IC Phone, the MAC address can be checked in: Settings > Device > Bluetooth</p>
		<p>[Restriction] Bluetooth® Handset does not support wideband codecs.</p> <p>[Restriction] Some cases of pairing loss. Will be corrected in the next version.</p>
Ingress protection		<p>Based on document: Degrees of Protection provided by Enclosures, (IP code) EN 60529</p> <p>Following classification is reached: - IP 50 protection level is to avoid visible dust under the LCD display window (this level is valid only for the LCD display area).</p>

Feature Description	Delivered	Comments
		<p>- IP 20 protection level for the terminal (applies NFC20-010 and DIN40050 standards) => test sphere 12.5mm</p> <p>The phone remains functional after the tests.</p>
Accessories		Items intended for use with 8082 My IC Phone which must be ordered separately in the ALE commercial catalog
Corded comfort handset		<p>[Info] Compatible only with HW-2 version.</p> <p>Reference: 3MG27032AA</p>
Power injector over Ethernet interface		<p>Powering of the terminal in case the Ethernet switch, which 8082 My IC Phone is connected to, does not provide PoE.</p> <p>Reference:</p> <ul style="list-style-type: none"> . 3MG27035AA for European countries (except countries listed below) . 3MG27035AR for Argentina . 3MG27035AS for Australia . 3MG27035BR for Brazil . 3MG27035CH for Switzerland . 3MG27035CN for China . 3MG27035IN for India . 3MG27035IT for Italy . 3MG27035JP for Japan . 3MG27035UK for the United Kingdom . 3MG27035US for the USA
Power jack adaptor		<p>Powering of the terminal in case, neither the Ethernet switch which 8082 My IC Phone is connected to, nor power injector are used.</p> <p>[Info] Compatible only with HW-2 version.</p> <p>Reference:</p> <ul style="list-style-type: none"> . 3MG27006AA for European countries . 3MG27006AR for Argentina . 3MG27006RW for other countries
Locking kit		<p>Small mechanical part designed to lock to the foot of the terminal. It provides a security slot for connection to a Kensington security cable.</p> <p>Reference: 3MG27033AA</p>
Headsets		<p>References:</p> <p>3GV 28045AB: Corded Headset Jabra/GN Netcom 2100 mono-aural</p> <p>3GV 28046AB: Corded Headset Jabra/GN Netcom 2100 bi-aural</p> <p>3GV 28047AB: Corded Headset Plantronics H251 mono-aural</p>

Feature Description	Delivered	Comments
		<p>3GV 28048AB: Corded Headset Plantronics H261 bi-aural</p> <p>Other headsets not orderable in the ALE commercial catalog will be approved through the AAPP process and listed on the Enterprise Business Portal.</p> <p>[Info] To make the headset operational, a manual action on 8082 My IC Phone may be necessary. For instance, after pairing a Bluetooth® headset, you must make sure that the accessory type "Bluetooth" is correctly selected in the audio settings.</p>
		<p>[Restriction] List of approved headsets for 8082 My IC Phone through the AAPP process is currently empty.</p> <p>[Restriction] Headsets not listed above and not in the AAPP approved list are not supported in case of malfunction.</p> <p>[Restriction] Headsets connected in USB mode are not supported.</p>
Battery for Bluetooth® handset		<p>Same item as for the Bluetooth® handset of IP Touch 4068.</p> <p>Reference: 3GV28041AB</p>
Webcam		<p>Logitech C920.</p> <p>Reference: 3MG27024AA</p>
Protocols		
Network TCP / IP		
802.1 P/Q		
Automatic VLAN Assignment (AVA) (only OpenTouch)		
DHCP		
SNTP + time zone management		
LLDP (only OpenTouch)		[Info] It is not possible to manage LLDP-VLAN through 8082 My IC Phone configuration menu.
LLDP geolocalization (only OpenTouch)		[Restriction] The location information can not be updated in time in local MMI after the 8082 My IC Phone acquired the LLDP message from switch port.
LLDP POE (only OpenTouch)		

Feature Description	Delivered	Comments
Quality of Service (QoS)		QoS tags for audio (RTP) and SIP signaling packets: layer 3: Differentiated Services (DiffServ) with IP TOS field layer 2: IEEE 802.1.p
SIP User Agent		
Support of RTP/RTCP		
IPv6		
Security		
http/https client		
User password (only OXO)		Manages voice mail access and phone set unlock.
GUI (system) password (only OpenTouch)		Monitored by ChangePassword setting (true for activation, false for deactivation).
TUI password (only OpenTouch)		Manages voice mail access. Access not possible on the phone set. Access possible through My IC Desktop.
2-port Ethernet switch management		[Info] Possibility to deactivate PC port for security reason.
802.1x MD5/TLS Authentication		
SIP TLS + sRTP		
Certificate download		
Save / Restore of user's personal settings (customization)		
Audio		
Ringing melodies (normal, progressive, beep)		Several MP3 ringing melodies are embedded in the terminal. Selection of the preferred melody in the user's settings.
		It is not possible to upload MP3 files on the terminal for use as ringing melodies.
Handset mode		Narrowband codecs: G711 (64kbit/s): A law and μ law G729
		[Restriction] Bluetooth® handset does not support wideband codecs.
Handsfree mode		Narrowband codecs: G711 (64kbit/s): A law and μ law G729 Wideband codecs: G722 (48kbit/s, 56kbit/s, 64kbit/s, framing 20ms) G722.2 also called AMR-WB. Bit rates from 6.60 to 23.85 kbit/s

Feature Description	Delivered	Comments
Group listening mode		<p>Narrowband codecs: G711 (64kbit/s): A law and μ law G729</p> <p>Wideband codecs (Loudspeaker part only): G722 (48kbit/s, 56kbit/s, 64kbit/s, framing 20ms) G722.2 also called AMR-WB. Bit rates from 6.60 to 23.85 kbit/s</p>
DTMF / feedback tone management		
Microphone mute		For all audio modes (handset, handsfree, headset)
Tone management (ringback tone, busy tone, call waiting tone, ...) (local or with DM)		
Hearing aids compatibility		
Audio player		<p>Decoding directly files from the USB memory stick.</p> <p>[Info] Audio formats supported: mp3, aac.</p> <p>[Info] It is necessary to keep the USB memory stick connected when playing audio files because audio files cannot be uploaded on the terminal.</p> <p>[Info] See also Media file manager</p>
Audio volume management		Volume +/- for all audio modes (handset, handsfree, headset).
Telephony		
Make Call		
Call Transfer		
Receive Call		
Receive Call (auto-answer)		
Music on hold		
Reject Call = Ignore Call		
Call Deflect		
Call Hold / Resume		
Enquiry call (make a 2nd call)		
Conference (local 3 parties)		
Conference (n mode) via add participant		

Feature Description	Delivered	Comments
Manual dialing		
Redial from Call History or Contacts		[Restriction] The terminal does not generate the trunk line access code (generally a leading "0") when it dials automatically numbers from Call History or Contacts. Therefore external short numbers will fail unless specific configuration is implemented for these numbers in the call server (example: 3699 to call the "Speaking Clock" in France).
Busy Call		[Info] Busy tone is notified to the caller when 8082 My IC Phone has reached « SIPMaxCall » limit. See also "Multi-line feature" below. [Info] When the number of active calls is lower than "SIPMaxCall", the terminal is considered as having free resource and therefore busy tone is not notified to the caller.
Call failure notification management		
Phone state notification		Top bar area with information about current phone state. Key press on this area restores the communication screen.
Voice mail (consultation with DTMF, left message, notification)		
Voice mail notification		[Info] Also called visual voice mail. VM log is splitted in two lists: 'New' and 'Messages'. Voice mails listed in 'New' switch to 'Messages' list as soon as they are listened.
Call recording (in VM or multi-parties conference)		
CLIR (caller id hidden)		[Info] Activate or deactivate CLIR in Settings > Application > Telephony > Hide identity
Multi-line		[Info] The number of concurrent calls is linked to the 8082 My IC Phone setting called "SIPMaxCall".
		[Restriction] When the setting "SIPMaxCall" is modified on the DM, it is mandatory to reset the 8082 My IC Phone so it can take the new value into account.
Broker call (switch between 2 calls)		
Call back request (CBR)		[Restriction] Supported with OT via voice prompt and DTMF code. Behavior depends on user's parameter "consider the user busy if one device is busy".
		Not supported on OXO.

Feature Description	Delivered	Comments
SEPLOS codes forwarding + return codes		
Transfer in ringing		
Multi Device Routing (only OpenTouch)		[Restriction] It is not allowed to use an OT user for 'other phone' routing.
Call Forward basic routing (only OXO)		
Video		
Video peer-to-peer between two 8082 My IC Phone sets		[Info] Only Logitech C920 webcams are supported.
		[Restriction] No video conference call supported. [Restriction] No video call transfer supported.
		[Restriction] If A in video call with B, then A calls C (audio call) so B is held, then conference between A and B and C is established, then C leaves the conference, then video escalation between A and B should be possible but is not.
Video peer-to-peer between a 8082 My IC Phone set and an OTC iPad (only OpenTouch)		Works with OTC iPad versions available on the Apple Store.
		[Restriction] On iPad side, no possibility to refuse a video escalation.
Video with doorcam (only OXO)		[Info] Doorcams will be approved through the AAPP process and listed on the Enterprise Business Portal. Today only Linkcom Link Slim IP Door Phone is supported www.linkcom.fr/en/door-phone/portier/link-slim-ip-door-phone Multiple instances of doorcams supported.
		[Restriction] Doorcam username/firstname must start with DOORCAM (uppercase).
Video in User Service		The user can see his/her video by starting local video in User Service menu.
High Availability		
Survivability (only OpenTouch)		Only for OpenTouch (SIP Server) [Info] Take care that survivability "keepalive" timer is not too short (30s is a minimum).
DHCP and DM survivability		

Feature Description	Delivered	Comments
Serviceability		
Provisioning from DM (Device Manager)		Configuration files, SW download.
Secured telnet (SSH)		See TG0065
Terminal software download and upgrade		See Hints for upgrade section.
Embedded Services		See TG0065
Migration		[Info] Proceed to a flash reset before migrating a terminal from a system to another.
Software version awareness		[Info] During boot, display of SW version (e.g. "R250.01.002.1") on the top left side of the screen during boot step 1. During upgrade, display of upgrade info like "R260.01.010.4 -> R260.01.011.0" on the top left side of the screen.
Device auto-discovery (only OpenTouch)		When the user first connects the device, he/she is asked to provide login information. The DM server automatically creates DM configuration files for the device according to the login information and links the device phone number to the hardware (MAC address) device.
		[Restriction] This feature works provided that the internal flash memory contains R250 1.008.4 or newer version.
Applications		
Homepage		Choice between "standard" and "advanced" modes.
		[Restriction] After reboot, the homepage is always back in "standard" mode. If need be, the user can switch back to "advanced" mode.
Contacts: local directory (filled out by user)		[Info] The maximum number of Contacts is limited by the setting DirMaxContact which is by default set to 500 for OT. It is possible to modify DirMaxContact: Settings > Admin (+ enter password) > Application > Address book > Maximum contact number for directory. 0 < Value ≤ 1000
		[Info] CLI: if last name is not available when creating a new contact from the Call History, contact is filled with the phone number.
Favorites		Subset of Contacts list
Question Mark Information Screen		[Info] If there is a wrong manipulation on the phone, there will be a black screen and a popup window with a question mark icon displayed on the screen indicating the reason of the issue.
Search by name		[Restriction] When search by firstname is used, some contacts may be missing if long list of users is returned.

Feature Description	Delivered	Comments
		<p>[Restriction] Sometimes the picture from external LDAP is not retrieved.</p> <p>[Restriction] When searching a contact name with accent, the contact may not be retrieved.</p>
Call history		<p>See also "Redial from Call History or Contacts".</p> <p>Call log is splitted in two lists: 'New' and 'History'. As soon as 'New' list is opened and closed, all listed calls switch to 'Historic' list.</p>
		[Restriction] When an external call is transferred from set A to set B, then set A number is displayed on set B instead of the external number.
Programmable keys / speed dial keys		<p>Possibility to create/modify/delete/move contacts keys, to move default keys, to reset keys configuration.</p> <p>[Info] Available only in homepage "standard" mode.</p> <p>[Info] To enable the programmable keys, the configuration file has to be set manually by adding the following setting: <setting id="EnableWebappProgkeys" value="true" override="true"/> You also need to set the 'override' attribute to false for the HomepageKeys setting.</p>
Auto-answer / receive 3rd party call for remote control by softphone (only OpenTouch)		<p>"Click to answer"</p> <p>When a user receives a call, his/her 8082 My IC Phone rings and displays the call. An "answer call" button appears on the OTC client. The user clicks on this button to answer the call and the 8082 My IC Phone takes the call.</p>
Settings (user, device...)		
Phone Settings		[Restriction] Entries in Admin Settings for eMail, Chat, Save Restore are displayed in the list of the phone settings but cannot be used because these applications are not available yet.
Settings (USB, Bluetooth®, etc)		[Info] User can't access Bluetooth® configuration during step 2 of the phone reboot. He/she needs to wait until step 5 (last initialization step).
Customization of the GUI		<p>User can change the skin using a list of skins defined in the user's settings. The change of skin occurs without reboot. Duration to change the skin is about 35s.</p> <p>[Info] In advanced homepage mode, up to 3 previews are allowed. See also "Programmable keys / speed dial keys".</p>
Wake up		Local application
Screensaver mode		[Info] The screensaver mode is entered after the time configured in the settings. It can be disabled using the settings parameters.

Feature Description	Delivered	Comments
Magnifying glass		For visually impaired people.
Dynamic virtual assistant (DVA) (only OpenTouch)		[Info] This feature is valid for OT only. It allows the callee to deflect an incoming call to a virtual assistant which allows caller to notify a urgent call to the callee or post a message in his/her voicemail.
Bluetooth® pairing		
API for external application		[Info] Only use of certified applications from AAPP website is supported. Certified applications have IWR available.
Graphical User Interface (GUI) in 29 languages		[Info] Some rare labels translations are still missing.
Lock / unlock / autolock		
Media file manager		<p>[Info] Only support of audio files (mp3, aac) and picture files (jpg/jpeg, png, bmp) on a USB memory stick connected to a USB port of 8082 My IC Phone.</p> <p>[Info] Only support of FAT16/32 filesystem on USB memory stick (32GBytes max). Only first FAT partition is used.</p> <p>[Info] The audio and picture files to be scanned must be located in a specific folder of the USB memory stick. This folder name must be set in Settings > Application > My files > UsbRootDirectory. Default value is /My IC Phone</p> <p>[Info] For best phone performance the recommended picture size for local avatar picture is 100x100 pixels (30 kbytes). Recommended picture size for background and screensaver pictures is 800x480 pixels (100 kbytes).</p> <p>[Info] Avatar picture is only used locally on the phone and is not transferred to the distant callee.</p> <p>[Info] Only pictures of the User Space can be used for Screensaver. Pictures located on the USB stick need to be copied on the phone before being set in the screensaver.</p>
		<p>[Restriction] File manager scans UsbRootDirectory folder (see info above) and handles only the first 200 files (whatever format, audio or picture or else) as a flat list in alphabetical order. Only audio and picture files that are included in the first 200 files are taken into account by the set.</p> <p>[Restriction] Files on USB memory stick are not detected if USB memory stick is plugged before power up of 8082 My IC Phone.</p> <p>[Restriction] Audio files cannot be copied on the terminal.</p>

Feature Description	Delivered	Comments
		<p>[Restriction] It is not possible to copy files from the terminal to the USB memory stick.</p> <p>[Restriction] It is not possible to use the terminal to remove files from the USB memory stick.</p>
Telephony Presence (only OpenTouch)		
Manager / Assistant 3:1 (OpenTouch)		<p>[Info] The feature is valid for up to three managers linked to one assistant (3 :1)</p> <p>[Info] Manager has no possibility to enter directly a call number in his/her white list. A contact card must be created before adding it in the white list.</p> <p>[Info] It is recommended to create entries in the white list from contacts with names, as contacts with number only would not be displayed in case of performing a search.</p> <p>[Info] Two key presses are required to pickup a monitored call: press on monitored call notification, answer call.</p> <p>[Info] It is recommended that Assistant does not use routing and overflow because Manager is not aware of these configurations. Manager is not aware of Assistant's absence either.</p> <p>[Info] It is recommended that Assistant has a sufficient number of lines to be available for the Manager. Consequently setting "SIPMaxCall" should be ≥ 3 and setting "ConsiderBusyIfOneLine" should not be set.</p> <p>[Info] Manager and Assistant must not hide their identity and keep the default identity setting (Settings > Application > Telephony > Hide identity = no).</p> <p>[Info] There is no presence information in the conversation screen. Therefore it is necessary to return to the homepage to get the presence status of the Manager (for the Assistant) or the Assistant (for the Manager).</p> <p>[Info] Multi-device: after getting control of the call, Manager or Assistant cannot use the Multi-device feature to switch their telephony device.</p> <p>[Info] Call notification is visual and audible. The audible method is made up of 3 beeps. Some users might consider that these beeps are not very loud.</p>

Feature Description	Delivered	Comments
	[Info]	Manager/Assistant feature is not operational when 8082 My IC Phone is in "Survivability mode".
		<p>[Restriction] Manager: when Manager is activated, routing profile is deactivated. If manager mode is deactivated, it is necessary to re-activate routing profile manually. If manager activates a forward, delegation mode is cancelled.</p> <p>[Restriction] Call log may be inconsistent.</p> <p>[Restriction] Intruding is not supported.</p> <p>[Restriction] When three managers are linked to the attendant, the manager list needs to be scroll down to fully display 3rd manager name.</p>
Manager / Assistant 1:1 (OXO)	[Info]	<p>The feature is valid for one manager linked to one assistant (1:1). Only manager's set is 8082 My IC Phone, assistant's is an IP Touch.</p> <p>It is recommended that Assistant does not use routing and overflow because Manager is not aware of these configurations.</p> <p>Manager must not hide his/her identity and keep the default identity setting (Settings > Application > Telephony > Hide identity = no).</p> <p>Manager/Assistant feature is not operational when 8082 My IC Phone is in "Survivability mode".</p>
		<p>[Restriction] No white list.</p> <p>[Restriction] No telephony presence.</p> <p>[Restriction] No "Manager monitors the calls and Assistant receives them" mode.</p> <p>[Restriction] Manager: when Manager is activated, routing profile is deactivated. If manager mode is deactivated, it is necessary to re-activate routing profile manually. If manager activates a forward, delegation mode is cancelled.</p> <p>[Restriction] Call log may be inconsistent.</p> <p>[Restriction] Intruding is not supported.</p> <p>[Restriction] In some cases, messages are left to assistant's voice mail instead of manager's voice mail.</p>

Feature Description	Delivered	Comments
Supervision and call pick-up (only OpenTouch)		[Info] Maximum number of supervised users is 10. [Info] Each supervisor or supervised user can belong to only one group.
Other certified applications		[Info] Certified applications are available in IWR section of the Enterprise Business Portal (Customer Support > Technical Support > Application Partner Interworking Reports > Products > OmniTouch My IC Phone)
User Manual		[Info] 29 languages in pdf format.

7 Bugs corrected in version 1.012.x

crms00xxxxxx is an internal ALE notation for registration of Change Requests (CR). Below is the list of CR implemented in 1.012.x.

7.1 Bugs corrected in version 1.012.5 vs. version 1.012.3

CR version 1.012.5	Headline
crms00419446	crash ICT audio on vhe
crms00441622	Auto answer of 2nd call by lifting the handset, knowing that the first call is automatically put on hold.
crms00441917	MYICPhone R260: parsing error on lanpbx.cfg while bascul to NOE mode
crms00450742	ict audio crash on vhe after search by name
crms00430827	Manager/Assistant application without user photo//910 BETA TEST//
crms00437656	My IC Phone hotel dialpad keys localization
crms00440735	VHE translation issue when in Korean Language
crms00442067	MyICPhone R260: retrieving from CS IP address not done in the correct order in lanpbx.cfg
crms00444970	ictaudio crash on vhe
crms00450444	Portuguese (EU) spelling mistake on MY IC 8082 phones
crms00451840	OpenTouch / Rel 1.3 / VHE reset after ICT audio crash

7.2 Bugs corrected in version 1.012.2 vs. version 1.012.1

CR version 1.012.2	Headline
crms00440406	VHE user with UM exchange 2010 erase the voice message all email are erased in box
crms00418622	Loss of webservices when using some special characters

7.3 Bugs corrected in version 1.012.0 vs. version 1.011.x

CR version 1.012.0	Headline
crms00403698	SIP OBS: default VoIP-RTP framing retained by OXO is not always 20ms as expected
crms00415002	MyIC Phone R260: cannot change the volume on Plantronics BT headset from VHE
crms00416036	8082 my ic phone date format in Chinese cannot display properly

8 List of 8082 My IC Phone settings

Column "default value" is the value assigned to the setting at power up of the phone. Note that default values in following tables may be overridden by other values coming from the call server centralized DM (Device Management) when the DM sends its configuration files to 8082 My IC Phone during the initialization phase of the phone.

Warning

This list is given only for information purpose.

The Business Partners are not allowed to use this information in order to modify optional settings file. Alcatel-Lucent Enterprise is not responsible for the misuse of these settings without Technical Support agreement. Misuse of settings without Technical Support agreement may force to proceed to a flash reset of the set.

Any setting modification must be recorded, and this record must be sent to Technical Support on request.

8.1 Settings which request a phone reset to be taken into account

name	default value	category	description
AudioPayloadTypes	101;96;117	Audio	dtmf pt;red pt;amr pt
ComLogVoiceMailPollingTimeout	0	Comlog	Disable/enable voice mail polling period
CurrentAdmcfgTimeZone	Universal	Date	current TZ env. variable
CurrentDemoMode	false	Phone configuration	If this setting is set to 'true', the phone set will boot into demo mode
CurrentDemoType	idle	Phone configuration	If demo mode is enable, this setting shows the demo type
CurrentEnetcfgDhcpMode	Dynamic	IP	Current DHCP client Mode Status
CurrentEnetcfgDhcpUserClass	ictouch.class0	Network	This setting contains the value of 'user class' option to be sent to DHCP server
CurrentEnetcfgDhcpUserClassEnable	false	Network	'user class' option for DHCP enabled/disabled
CurrentEnetcfgDmBackupUrl		DM	Backup DM server url
CurrentEnetcfgDmUrl		DM	DM server url
CurrentEnetcfgDns1	0.0.0.0	DNS	First DNS Server
CurrentEnetcfgDns2	0.0.0.0	DNS	Second DNS Server
CurrentEnetcfgDns3	0.0.0.0	DNS	Third DNS Server
CurrentEnetcfgDomain		IP	Domain ex:alcatel-lucent.com
CurrentEnetcfgInterface	eth0	IP	Network Interface Name
CurrentEnetcfgIpaddr	0.0.0.0	IP	IP address
CurrentEnetcfgMacaddr	00:00:00:00:0	Network	MAC address

	0:00		
CurrentEnetcfgRouter	0.0.0.0	IP	Default Gateway
CurrentEnetcfgSntpSyncStatus	NO	Date	Indicates if system clock is updated with the SNTP server. This value is updated every SntpRefreshPeriod
CurrentEnetcfgSubnet	255.255.255.255	IP	Subnet mask
CurrentEnetcfgVlan	4095	IP	If Vlan is enable, this setting contains vlan number
CurrentEthlcfgLanAuto	true	Ethernet	LAN interface auto negotiation mode enable/disable
CurrentEthlcfgLanDuplex	Full	Ethernet	LAN interface duplex mode (full/half)
CurrentEthlcfgLanSpeed	100	Ethernet	LAN interface Speed
CurrentEthlcfgPcAuto	true	Ethernet	PC interface auto negotiation mode enable/disable
CurrentEthlcfgPcDuplex	Full	Ethernet	PC interface duplex mode (full/half)
CurrentEthlcfgPcSpeed	100	Ethernet	PC interface Speed
CurrentLldpcfgAssetid		LLDP	Custom ID set by DM. By default this setting contains the mac address
CurrentLldpcfgCivicAddressLci		LLDP	Civic address localisation Value
CurrentLldpcfgCoordinateBasedLocation		LLDP	Coordinate based localisation Value
CurrentLldpcfgEcsElin		LLDP	ECS ELIN format localisation Value
CurrentLldpcfgPowerAccepted	false	LLDP	If the switch accepts to provide the requested power value this setting is set to 'true'
CurrentLldpcfgPowerPriority	2	LLDP	Power priority (level) requested by ICTouch to the switch
CurrentLldpcfgPowerRequested	130	LLDP	Value of the power requested by ICTouch
CurrentLldpcfgPowerValue	0	LLDP	The switch power answer to ICTouch
CurrentSecucfgPcPort	false	Security	PC port Status
CurrentSecucfgPcPortVlanFilter	false	Security	Activation of Vlan filtering feature on PC port
CurrentWpa8021xcfgLogin	ALCICT	802.1x	login used during 802.1x authentication
CurrentWpa8021xcfgMac2login	false	802.1x	Says if mac is added to 802.1x login
CurrentWpa8021xcfgMd5Passwd		802.1x	MD5 password used during 802.1x authentication
CurrentWpa8021xcfgMode	OFF	802.1x	802.1x authentication enable/disable
CurrentWpa8021xcfgServerAuthent	false	802.1x	Enable/Disable server authentication in 802.1x TLS handshake. Set through local MMI
DeveloperMode	false	Log	If set to true, Run the uncompressed javascript with logs.

			<p>used by DM to set the time zone. VHE supports a predefined list for time zones;this list should cover all known zones. Supported values are following [CONTINENT/CAPITAL] entries: [Universal] (UTC) Universal [Pacific/Midway] (GMT-11:00) Midway Island, Samoa [America/Adak] (GMT-10:00) Adak, Hawaii [Pacific/Marquesas] (GMT-09:30) Marquesas Islands [America/Anchorage] (GMT-09:00) Anchorage, Alaska [Pacific/Gambier] (GMT-09:00) Gambier Islands [America/Ensenada] (GMT-08:00) Ensenada, Tijuana, Baja California [America/Los_Angeles] (GMT-08:00) Los Angeles, (Pacific Time: US and Canada) [America/Chihuahua] (GMT-07:00) Chihuahua, La Paz, Mazatlan [America/Dawson_Creek] (GMT-07:00) Dawson Creek, Arizona [America/Denver] (GMT-07:00) Denver, Mountain Time (US and Canada) [America/Belize] (GMT-06:00) Belize, Saskatchewan, Central America [America/Cancun] (GMT-06:00) Cancun, Guadalajara, Mexico City, Monterrey [America/Chicago] (GMT-06:00) Chicago, Central Time (US and Canada) [Chile/EasterIsland] (GMT-06:00) Easter Island [America/Bogota] (GMT-05:00) Bogota, Lima, Quito, Rio Branco [America/Havana] (GMT-05:00) Havana [America/New_York] (GMT-05:00) New York, Eastern Time (US and Canada) [America/Caracas] (GMT-04:30) Caracas [America/Campo_Grande] (GMT-04:00) Campo Grande (Brazil) [America/Glace_Bay] (GMT-04:00) Glace Bay, Goose Bay (Atlantic Time) [America/La_Paz] (GMT-04:00) La Paz [America/Santiago] (GMT-04:00) Santiago [Atlantic/Stanley] (GMT-04:00) Stanley, Falkland Islands [America/St_Johns] (GMT-03:30) St Johns, Newfoundland [America/Argentina/Buenos_Aires] (GMT-</p>

EnableWebappSynchronization	true	Synchronization	Will enable or disable the Synchronization webapp
EnableWebappUserinfo	true	Userinfo	Will enable or disable the webapp Userinfo
EnableWebappUserservices	true	Userservices	Will enable or disable the webapp Userservices
EnableWebappVoicemail	true	Voicemail	Will enable or disable the webapp Voicemail
EnableWebappWakeup	true	Wakeup	Will enable or disable the webapp Wakeup
HttpdOpen	false	Log	Indicates if httpd is accessible from outside ICTouch
IMAvailable	false	IM	Indicates if the IM is activated or not : this includes IM presence and instant messaging features
IMLogin		IM	IM address of the current user
LocalAdmcfgTimeZone	Universal	Date	used to initialize the TZ env. variable set by local MMI
LocalCtlActivateCaDeployment	false	Certificates	Enable/Disable the use of the CTL file stored on the plugged USB key to authenticate the DM at next reset. By local MMI
LocalCtlActivateSigning	false	Certificates	Activate the signature of the CTL file on the USB key. by local MMI
LocalDemoMode	false	Phone configuration	If this setting is set to 'true', the phone set will boot into demo mode
LocalDemoType	idle	Phone configuration	If demo mode is enable, this setting set the demo type
LocalEnetcfgDhcpMode	Dynamic	IP	DHCP client Mode
LocalEnetcfgDhcpUserClass	ictouch.class0	Network	This setting contains the value of 'user class' option to be sent to DHCP server
LocalEnetcfgDhcpUserClassEnable	false	Network	Enable/Disable 'user class' option for DHCP

LocalEnetcfgDmBackupUrl		DM	Backup DM server url. This Setting is set by user
LocalEnetcfgDmUrl		DM	DM server url
LocalEnetcfgDns1	0.0.0.0	DNS	First DNS Server
LocalEnetcfgDns2	0.0.0.0	DNS	Second DNS Server
LocalEnetcfgDns3	0.0.0.0	DNS	Third DNS Server
LocalEnetcfgDomain		IP	Domain ex:alcatel-lucent.com
LocalEnetcfgInterface	eth0	IP	Network Interface Name
LocalEnetcfgIpaddr	0.0.0.0	IP	IP address
LocalEnetcfgRouter	0.0.0.0	IP	Default Gateway
LocalEnetcfgSubnet	255.255.255.255	IP	Subnet mask
LocalEnetcfgVlan	4095	IP	If Vlan is enable, this setting contains vlan number
LocalEnetcfgVlanEnable	false	IP	Vlan use Enable/Disable
LocalEthlcfgLanAuto	true	Ethernet	LAN interface auto negociation mode enable/disable
LocalEthlcfgLanDuplex	Full	Ethernet	LAN interface duplex mode (full/half)
LocalEthlcfgLanSpeed	100	Ethernet	LAN interface Speed
LocalEthlcfgPcAuto	true	Ethernet	PC interface auto negociation mode enable/disable
LocalEthlcfgPcDuplex	Full	Ethernet	PC interface duplex mode (full/half)
LocalEthlcfgPcSpeed	100	Ethernet	PC interface Speed
LocalLLdpcfgPowerPriority	2	LLDP	Power priority (level) requested by ICTouch to the switch
LocalSeqIpConfig		IP	RESERVED
LocalWpa8021xcfgLogin	ALCICT	802.1x	login used during 802.1x authentication. set by local MMI
LocalWpa8021xcfgMac2login	false	802.1x	adds mac to 802.1x login. Set by local MMI
LocalWpa8021xcfgMd5Passwd		802.1x	MD5 password used during 802.1x authentication. set through local MMI
LocalWpa8021xcfgMode	OFF	802.1x	Enable/Disable 802.1x authentication. set by local MMI
LocalWpa8021xcfgServerAuthent	false	802.1x	Enable/Disable server authentication in 802.1x TLS handshake. Set through local MMI
SIPAuthenticationName		SIP	Authenticate name
SIPAuthenticationPassword		SIP	Authenticate password
SIPAuthenticationRealm		SIP	Authenticate realm
SIPDeviceUri		SIP	Device SIP uri used to register
SIPDisplayName		SIP	Display name
SIPDomainName		SIP	Domain name
SIPDSCP	40	SIP	SIP DSCP field in IP header
SIPDtmfMode	2	SIP	Dtmf mode
SIPGroup1AuthenticationName		SIP	Group1's authenticate name

SIPGroup1AuthenticationPassword		SIP	Group1's authenticate password
SIPGroup1AuthenticationRealm		SIP	Group1's authenticate realm
SIPGroup1DeviceUri		SIP	Group1's device uri used to register
SIPGroup1DisplayName		SIP	Group1's display name
SIPGroup1DomainName		SIP	Group1's domain name
SIPGroup1DtmfMode	2	SIP	Sip server group1's dtmf mode
SIPGroup1Policy	0	SIP	Sip server group1's policy
SIPGroup1SurvivabilityMode	false	SIP	Whether the servers inside the group are for survivability
SIPGroup1TransportMode	0	SIP	Group1 transport mode
SIPGroup2AuthenticationName		SIP	Group2's authenticate name
SIPGroup2AuthenticationPassword		SIP	Group2's authenticate password
SIPGroup2AuthenticationRealm		SIP	Group2's authenticate realm
SIPGroup2DeviceUri		SIP	Group2's device uri used to register
SIPGroup2DisplayName		SIP	Group2's display name
SIPGroup2DomainName		SIP	Group2's domain name
SIPGroup2DtmfMode	2	SIP	Sip server group2's dtmf mode
SIPGroup2Policy	0	SIP	Sip server group2's policy
SIPGroup2SurvivabilityMode	false	SIP	Whether the servers inside the group are for survivability
SIPGroup2TransportMode	0	SIP	Group2 transport mode
SIPGroup3AuthenticationName		SIP	Group3's authenticate name
SIPGroup3AuthenticationPassword		SIP	Group3's authenticate password
SIPGroup3AuthenticationRealm		SIP	Group3's authenticate realm
SIPGroup3DeviceUri		SIP	Group3's device uri used to register
SIPGroup3DisplayName		SIP	Group3's display name
SIPGroup3DomainName		SIP	Group3's domain name
SIPGroup3DtmfMode	2	SIP	Sip server group3's dtmf mode
SIPGroup3Policy	0	SIP	Group3's policy
SIPGroup3SurvivabilityMode	false	SIP	Whether the servers inside the group are for survivability
SIPGroup3TransportMode	0	SIP	Group3 transport mode
SIPKeepAliveFailureTimes	1	SIP	Keep alive failure times before considering link lost
SIPLocalRtpPort	6000	SIP	Local rtp begin port
SIPLocalSipPort	5060	SIP	Local sip service port
SIPLocalSipsPort	5061	SIP	Local sip security service port
SIPLocalSrtpPort	30000	SIP	Local Srtp port
SIPMessageWaitingIndicationUri		SIP	Message waiting indication server address
SIPOutboundProxyAddress		SIP	Outbound proxy address
SIPOutboundProxyPort	5060	SIP	Outbound proxy service port
SIPPhoneStateNotifyType		SIP	Phone State Notify server Type
SIPPreferredVocoder	8;0;9;18;119	SIP	The preferred voice codec sequence
SIPProxyAddress		SIP	Proxy address
SIPProxyPort	5060	SIP	Proxy service port

SIPRegisterExpire	3600	SIP	Expire time on register
SIPRegisterRetry	300	SIP	Register retry time
SIPRegistrarAddress		SIP	Registrar address
SIPRegistrarPort	5060	SIP	Registrar service port
SIPServer1Address		SIP	Server1's address
SIPServer1GroupNumber	1	SIP	Server1's group number, the group number is increasing one by one from server1 to server4
SIPServer1KeepAlive	0	SIP	The time between two Keep alive SIP OPTION message for server1, 0 for disable
SIPServer1Port	5060	SIP	Server1 service port
SIPServer2Address		SIP	Server2's address
SIPServer2GroupNumber		SIP	Server2's group number, the group number is increasing one by one from server1 to server4
SIPServer2KeepAlive	0	SIP	The time between two Keep alive SIP OPTION message for server2, 0 for disable
SIPServer2Port	5060	SIP	Server2 service port
SIPServer3Address		SIP	Server3's address
SIPServer3GroupNumber		SIP	Server3's group number, the group number is increasing one by one from server1 to server4
SIPServer3KeepAlive	0	SIP	The time between two Keep alive SIP OPTION message for server3, 0 for disable
SIPServer3Port	5060	SIP	Server3 service port
SIPServer4Address		SIP	Server4's address
SIPServer4GroupNumber		SIP	Server4's group number, the group number is increasing one by one from server1 to server4
SIPServer4KeepAlive	0	SIP	The time between two Keep alive SIP OPTION message for server4, 0 for disable
SIPServer4Port	5060	SIP	Server4 service port
SIPSipTransportMode	0	SIP	Sip transport mode
SIPSrtpAuthentication	0	SIP	SIP SRTP Authentication Mode
SIPSrtpWorkingMode	0	SIP	Srtp working mode
SIPUserName		SIP	User name for IMPP
SIPUserPriority	5	SIP	802.1P User priority for SIP
SIPVoIPTicketsCollector		SIP	SIP VoIP Tickets Collector
TelephonyPresenceAvailable	false	IM	Indicates if the telephonic presence is activated or not

8.2 Settings which do not request a phone reset to be taken into account

name	default value	category	description
ActionButtonInDialpad	0	Search	Action button in Alphanum Keyboard
ActiveRouting		Telephony	The configuration of the active routing, if any
AgendaAlarmContext	LOCAL	Agenda	Local wake-up is triggered by the phone itself. Remote wake-up is triggered by OXE through SEPLOS
AgendaAlarmDurationOff	5	Agenda	Idle duration between two alarms bursts
AgendaAlarmDurationOn	1	Agenda	Alarm ringing duration
AgendaAlarmOccurrences	3	Agenda	Number of alarm triggers for one user programming (when the user doesn't stop it)
AgendaDefaultAppointments		Agenda	Init appointments on start-up
AgendaMaxNumberAppointments	200	Agenda	The maximum number of appointments that the user can create.
AgendaNotificationDelay	15	Calendar	Delay between start of notification and real event
AllowDirectCustomForward	true	Phone configuration	Enable or disable the custom forward possibility
ApplicativeServerUrl		Application server	Url of non ICS applicative server
Audio8021p	5	Audio	PRIORITY:Audio 802.1p priority
AudioAccessoryEnableDevice	1	Audio	Enable JACK/USB/BT accessory device
AudioAMRBitRate	2	Audio	The rate of AMR WB codec(Preferred rate for the caller when initiating an outgoing call)
AudioBeamformingHandsfreeEnhancement	false	Audio	Beamforming handsfree enhancement or not
AudioBreathReduction	false	Audio	Breath reduction or not
AudioBtDeviceType	1	Audio	Configure the BT device as headset, handsfree or loudspeaker
AudioBusyTone	1;400;0;0;0;2 963;0;0;0;0;0 ;2;1;1;1;375; 0;0;0;375;0;0 ;0;0;0;0;0;0 ;0;0;0;0;0;0 ;0;0;0;0;0;0 ;0	Audio	User-defined busy tone data (8 states)
AudioCHoldTone	2;420;335;0;0 ;2963;2963;0; 0;0;0;4;1;1;3; 200;0;2;0;200	Audio	User-defined call hold tone data (8 states)

	;1;3;3;200;0; 0;0;5000;0;0; 0;0;0;0;0;0;0; 0;0;0;0;0;0;0		
AudioCWaitTone	1;400;0;0;0;2 963;0;0;0;0;0 ;2;1;1;1;200; 0;0;0;5000;0; 0;0;0;0;0;0;0; 0;0;0;0;0;0;0; 0;0;0;0;0;0;0; 0;0	Audio	User-defined call waiting tone data (8 states)
AudioDialTone	2;350;440;0;0 ;2963;2963;0; 0;0;0;1;33;0; 3;0;0;0;0;0;0; 0;0;0;0;0;0;0; 0;0;0;0;0;0;0; 0;0;0;0;0;0;0; 0;0	Audio	User-defined dial tone data (8 states)
AudioDiffServ	46	Audio	TOS/DiffServ:Field to be included in the IP headers of the RTP/RTCP packets
AudioDtmfDuration	0	Audio	Dtmf Duration
AudioDtmfFeedbackEnable	true	Audio	Enable/disable DTMF feedback
AudioDtmfLevel	0	Audio	bias value of DTMF tone level
AudioHandsetVolume	2	Audio	Handset volume level
AudioHeadsetVolume	3	Audio	Headset volume level
AudioHearingAidEnable	false	Audio	Enable/disable Hearing Aid
AudioJackDeviceType	1	Audio	Configure the JACK device as headset, handsfree or loudspeaker
AudioNoiseReduction	false	Audio	Noise reduction or not
AudioPacketTime	20;20;20;20;2 0	Audio	Packet time
AudioRingAppointment		Audio	List of available appointment ring melodies (TEXT_CHOICE format)
AudioRingAppointmentChoice	/usr/share/rin gdata/ring12. mp3	Audio	Configure appointment ring melody
AudioRingBeep	0	Audio	Configure ring beep
AudioRingExternal		Audio	List of available external ring melodies (TEXT_CHOICE format)
AudioRingExternalChoice	/usr/share/rin gdata/ring18. mp3	Audio	Configure external ring melody
AudioRingInternal		Audio	List of available internal ring melodies (TEXT_CHOICE format)
AudioRingInternalChoice	/usr/share/rin gdata/ring18.	Audio	Configure internal ring melody

	mp3		
AudioRingLock	false	Audio	Lock/Unlock ring control to user
AudioRingProgressive	false	Audio	Configure ring progressive
AudioRingSilent	false	Audio	Enable/disable ring silent
AudioRingSpecial		Audio	List of available special ring melodies (TEXT_CHOICE format)
AudioRingSpecialChoice	/usr/share/ringdata/ring18.mp3	Audio	Configure special ring melody
AudioRingTone	1;400;0;0;0;4029;0;0;0;0;0;4;1;1;1;400;0;2;0;200;1;3;1;400;0;0;0;2000;0;0;0;0;0;0;0;0;0;0;0	Audio	User-defined ringback tone data (8 states)
AudioRingVolume	5	Audio	Ring volume level
AudioRj9Device	0	Audio	The RJ9 device is configured as handset or as headset
AudioRlrHandset	0	Audio	Handset RLR bias for tuning
AudioSidetoneHandset	0	Audio	Handset sidetone bias for tuning
AudioSlrHandset	0	Audio	Handset SLR bias for tuning
AudioSpeakerPhoneVolume	5	Audio	Speakerphone volume level
AudioToneCountry	0	Audio	country standard for call progress tone
AudioUsbDeviceType	1	Audio	Configure the USB device as headset, handsfree or loudspeaker
AudioUseCustomTone	false	Audio	Enable to use the 5 tones defined in the setting
AudioVad	false	Audio	Enable/disable audio VAD(Voice Activity Detection)
AudioVoiceSignalLimitation	false	Audio	Voice signal limitation or not
AutoLock	false	Lock	
BacklightDelay	120	Screensaver	Delay before the backlight becomes inactive
BackToHomepageAtEndCall	true	Communication	set to true to go to homepage after a call
BeepEnabled	false	Phone configuration	Enable low level beep feedback
BTHandseDfuVer	0	BT	bluetooth handset firmware version
BTHandset	false	BT	bluetooth handset
BTHandsetAircoding	0	BT	bluetooth handset aircoding type
BTHandsetBdAddr	00:00:00:00:00:00	BT	bluetooth handset bdaddr
BTHandsetCod	0	BT	bluetooth handset cod
BTHandsetCodec	1	BT	BTH codec selection

BTHandsetEscoSupported	false	BT	bluetooth handset supports esco or not
BTHandsetKeyType	0	BT	bluetooth handset key type
BTHandsetLinkKey	{0,0,0,0,0,0,0,0,0,0,0,0,0,0,0,0}	BT	bluetooth handset link key
BTHandsetName	Ictouch handset	BT	bluetooth handset name
BTHandsetTrusted	false	BT	bluetooth handset trusted or not
BTHeadset	false	BT	bluetooth headset
BTHeadsetAircoding	0	BT	bluetooth headset aircoding type
BTHeadsetBdAddr	00:00:00:00:00:00	BT	bluetooth headset bdaddr
BTHeadsetCod	0	BT	bluetooth headset cod
BTHeadsetCodec	1	BT	BTHS codec selection
BTHeadsetEscoSupported	false	BT	bluetooth headset supports esco or not
BTHeadsetKeyType	0	BT	bluetooth headset key type
BTHeadsetLinkKey	{0,0,0,0,0,0,0,0,0,0,0,0,0,0,0,0}	BT	bluetooth headset link key
BTHeadsetName	Ictouch handset	BT	bluetooth headset name
BTHeadsetTrusted	false	BT	bluetooth headset trusted or not
BTHUploadMode	0	BT	Upgrade BTH APP or LOADER
BTOther	false	BT	other bluetooth device
BTOtherAircoding	0	BT	other bluetooth device aircoding type
BTOtherBdAddr	00:00:00:00:00:00	BT	other bluetooth device bdaddr
BTOtherCod	0	BT	other bluetooth device cod
BTOtherEscoSupported	false	BT	other bluetooth device supports esco or not
BTOtherKeyType	0	BT	other bluetooth device key type
BTOtherLinkKey	{0,0,0,0,0,0,0,0,0,0,0,0,0,0,0,0}	BT	other bluetooth device link key
BTOtherName	MyIC Phone handset	BT	other bluetooth device name
BTOtherTrusted	false	BT	other bluetooth trusted or not
BTTerminalDfuVer	0	BT	bluetooth Terminal firmware version
ChangePassword	*****	Password	Display the screen to change the password
ComlogFilter	40	Communication	Represent the comlog entry type and the read/unread state to be displayed
ComLogNotifyMissedCalls	true	Comlog	Defines if the missed calls should be or not notified with a button on the top of the screen
ComLogSize	80	Communication	maximum number of entries in comlog

ConferenceAlwaysLocal	false	Telephony	Indicates if the conference should be local even if the web services are available.
ConnectivityIconsPositions	{name:'ethernet-link',pos:1};{name:'sip-registration',pos:2};{name:'ics-login',pos:3};{name:'interphony',pos:4};{name:'usb',pos:5};{name:'bluetooth',pos:6};{name:'headset',pos:7};{name:'wakeupp',pos:8};{name:'ringsilent',pos:1}	Connectivity	Connectivity icons names and associated positions
ContactFirstNameOrder	1	Phone configuration	List the available orders of the First and Last Names of the contacts, with the selected one in the jsvalue
ContactMaxAddresses	3	Address book	
CurrentAdmcfgCfgfilePollingEnable	false	Polling timer	Enable/disable configuration update process polling
CurrentAdmcfgCfgfilePollingTimeout	86400	Polling timer	Configuration update process polling period (in Sec)
CurrentAdmcfgDateTime		Date	Date/Time. format: 'YYYY-MM-DD HH:MM'
CurrentAdmcfgUpdatePollingEnable	false	Polling timer	Enable/disable software update process polling
CurrentAdmcfgUpdatePollingTimeout	86400	Polling timer	Software update process polling period (in Sec)
CurrentAdmcfgUpdateTimeDelta	0	Polling timer	Maximum random delay to start update process checks
CurrentAdmcfgUpdateTimeEnable	false	Polling timer	Enable/disable software update process checks
CurrentAdmcfgUpdateTimeStart	00:00	Polling timer	Start time for update process checks
CurrentEnetcfgSntp	0.0.0.0	Network	SNTP Server
CurrentEnetcfgSntpRefreshPeriod	3600	Network	time (in Sec) between two SNTP synchronization actions
CurrentFabHwVersion		Version	Hardware revision version
CurrentFabPcms		Version	PCMS

CurrentFabPhoneModel	UNKNOWN	Version	Device Model (VHE/LE/MR)
CurrentFabSerialNumber		Version	Device Serial Number
CurrentFabSwVersion		Version	Manufacturer software version
CurrentSoftwareDate		Version	ALU Software production date
CurrentSoftwareVersion		Version	ALU Software version
DateFormat	0	Phone configuration	List the available formats of date, with the selected one in the jsvalue
DdiNumberPattern		Hotel	Define the DDI number patter used to compute the DDI number
DDIRange		Hotel	This setting is used for checking if the Guest has a DDI number or not
DefaultActions		Programmable Keys	
Defaultkeyboard	0	Phone configuration	List the available keyboards types, as well as the current one in the jsvalue
DefaultKeys		Programmable Keys	
DestCharSet	utf-8	eMail	Local Charset for inbound conversion and sendings
DhcpEnetcfgDm		DM	DM Server. This setting is set through DHCP
DhcpEnetcfgDmBackup		DM	Backup DM Server used if main DM fails. This setting is set through DHCP
DhcpEnetcfgDmBackupConfigPath		DM	This setting is set through DHCP
DhcpEnetcfgDmConfigPath		DM	This setting is set through DHCP
DhcpEnetcfgDmUrl		DM	DM server url
DhcpEnetcfgDns1		DNS	First DNS Server
DhcpEnetcfgDns2		DNS	Second DNS Server
DhcpEnetcfgDns3		DNS	Third DNS Server
DhcpEnetcfgDomain		IP	Domain ex:alcatel-lucent.com
DhcpEnetcfgIpaddr		IP	IP address
DhcpEnetcfgRouter		IP	Default Gateway
DhcpEnetcfgSntp		Network	SNTP Server
DhcpEnetcfgSubnet		IP	Subnet mask
DialingRuleAreaCode		Telephony	Area code
DialingRuleAreaCodeSave		Telephony	Saving value of DialingRuleAreaCode for detecting change
DialingRuleCountryCode	FR	Telephony	ISO 3166 country code (Alpha-2)
DialingRuleCountryCodeSave	EN	Telephony	Saving value of DialingRuleCountryCode for detecting change
DialingRuleExternalPrefix	0	Telephony	Specify the prefix to use to make an external call
DialingRuleExternalPrefixExceptions		Telephony	Specify the list of exceptions when adding the external prefix

DialingRuleExternalPrefixExceptionsSave		Telephony	Saving value of DialingRuleExternalPrefixException for detecting change
DialingRuleExternalPrefixSave	0	Telephony	Saving value of DialingRuleExternalPrefix for detecting change
DialingRuleMinNumberLength	6	Telephony	Specify the phone number length from which we must add the external prefix
DialingRuleMinNumberLengthSave	6	Telephony	Saving value of DialingRuleMinNumberLength for detecting change
DialingToneEnabled	false	Telephony	defines if dialing tone should be heard or not during dialing phases.
DirectoryDefaultContacts		Address book	
DirMaxContact	500	Address book	
DirMaxWordSearch	3	Address book	
DisplayedInfoCheckin	1	Hotel	Configuration of the label to display on the topbar in hotel mode, when the room is in checkin state
DisplayedInfoCheckout	1	Hotel	Configuration of the label to display on the topbar in hotel mode, when the room is in checkout state
DisplayedNameCheckout	1	Hotel	This setting defines the information that have to be displayed on the first line of user-info area when the phone is in checkout state.
DmAdmcfgCfgfilePollingEnable	false	Polling timer	Enable/disable configuration update process polling
DmAdmcfgCfgfilePollingTimeout	86400	Polling timer	Configuration update process polling period (in Sec)
DmAdmcfgInventoryUrl		Inventory	Url into which the inventory file will be put
DmAdmcfgUpdatePollingEnable	false	Polling timer	Enable/disable software update process polling
DmAdmcfgUpdatePollingTimeout	86400	Polling timer	Software update process polling period (in Sec)
DmAdmcfgUpdateTimeDelta	0	Polling timer	Maximum random delay to start update process checks
DmAdmcfgUpdateTimeEnable	false	Polling timer	Enable/disable software update process checks
DmAdmcfgUpdateTimeStart	00:00	Polling timer	Start time for update process checks
DmAdminPasswd		Password	used to set password for the user 'admin'

DmCtlFile		Certificates	Path of the CTL file on the DM. Set by DM
DmCtlHash		Certificates	MD5 hash of the CTL file on the DM\nhello
DmCtlSigningMacaddr		Certificates	Mac address of the terminal that have signed the CTL file. Set by DM
DmEnetcfgSntp	0.0.0.0	Network	SNTP Server
DmEnetcfgSntpRefreshPeriod	3600	Network	time (in Sec) between two SNTP synchronization actions
DmEnetcfgUpgrade		Network	Upgrade Process enable/disable
DmEnetcfgUpgradeFile		Network	Url of the profile file
DmSecucfgSsh	false	Security	Enable ssh connections
DndRequiresPassword	false	IctUser	Dnd activation requires a password
DoNotDisturb	false	Phone configuration	Activate / deactivate the 'Do Not Disturb' state
DTMFPattern	\$DTMF\$	Communication	define the DTMF pattern of a number
EmailAccount		eMail	For use against SMTP server
eMailDefaultFilter	all	eMail	Default filter for GUI
eMailDefaultSort	By Sender	eMail	Default sort for GUI
EmailEnabled	false	eMail	
EmailLogin		eMail	For use against IMAP or POP3 server
eMailMaxAttSize	1000000	eMail	Max accepted attachment size in bytes
eMailMaxLocalNumber	100	eMail	Maximum number of eMails accepted on local storage
EmailPassword		eMail	
eMailReceiptInterval	1	eMail	Nb of minutes between each batch receipt
eMailType	POP3	eMail	Default server protocol
EmergencyIcon1	sdk-emergency	Emergency Number	Icon used for the Emergency Button 1
EmergencyIcon2	sdk-emergency	Emergency Number	Icon used for the Emergency Button 2
EmergencyIcon3	sdk-emergency	Emergency Number	Icon used for the Emergency Button 3
EmergencyLabel1		Emergency Number	Label used for the Emergency Button 1
EmergencyLabel2		Emergency Number	Label used for the Emergency Button 2
EmergencyLabel3		Emergency Number	Label used for the Emergency Button 3
EmergencyNumber1		Emergency Number	Call number used for the Emergency Button 1, which is hidden if there is no number

EmergencyNumber2		Emergency Number	Call number used for the Emergency Button 2, which is hidden if there is no number
EmergencyNumber3		Emergency Number	Call number used for the Emergency Button 3, which is hidden if there is no number
EnableAddContactButton	true	Contacts	Enable Add Contact button for the hotel mode
EnableAgendaCalendarPreview	false	Calendar	Will enable or disable the webapp Agenda Calendar's preview
EnableAgendaPreview	false	Calendar	Will enable or disable the webapp Agenda's preview
EnableCommunicationPreview	true	Communication	Will enable or disable the webapp Communication's preview
EnableContactsPictureInMenu	false	Contacts	Will enable or disable the Contacts' pictures in contact lists
EnableContactsPreview	true	Favorites	Will enable or disable the webapp Contacts's preview
EnableEmailPreview	false	eMail	Will enable or disable the webapp Email's preview
EnableLockOnHomepage	true	Lock	Will enable or disable the webapp Lock Button on the Homepage
EnableManagerassistantPreview	false	Manager Assistant	Will enable or disable the webapp Managerassistant's preview
EnablePhotoInComlog	false	Communication	Enable Photo In Comlog
EnableProgkeysPreview	true	Programmable keys	Will enable or disable the webapp ProgKeys's preview
EnableRouting	true	Phone configuration	Add / remove the Routing button
EnableRoutingLed	true	Phone configuration	Enable / Disable the Routing Led
EnableUserDetails	true	Phone configuration	Add / remove the user info button
EnableUserPhoto	false	Manager Assistant	Will enable or disable the Managerassistant's photo on preview
EnableUserPicture	true	UserData	Enable user picture
EnableUserPresence	true	Phone configuration	Add / remove the Presence IM and Presence Telephony button
EnableVoicemailEdition	true	Phone configuration	Add / remove the Voicemail button
EnableVoicemailScreensaver	false	Screensaver	Enable or not the voicemail screensaver

FileDiskUserQuota	30	File Manager	max. size storage for user in Mb
FileManagerAlarmMelodies		File Manager	List of melodies for alarm
FileManagerShowFileLocationInformation	true	File Manager	show the location of the file(usb, local, web)
FileManagerShowFilesType	true	File Manager	show the file type(video, audio, photo, web radio, web tv)
FileManagerUsbRootDirectory	/My IC Phone	File Manager	root directory for the usb files
FileMaxScanOnUsb	200	File Manager	Maximum number of files to scan on USB
FilesManagerFilter	0;1	File Manager	Contains device filter
FileUserPath	/data	File Manager	the path of the user space
HapticEnabled	true	Phone configuration	Enable haptic feedback
HiddenConnectivityIcons	[{item:'ethernet-link',status:'1000'}, {item:'ethernet-link',status:'100'}, {item:'ethernet-link',status:'10'}, {item:'sip-registration',status:'ok'}, {item:'ics-login',status:'ok'}, {item:'bluetooth',status:'outofreach'}]	Connectivity	Connectivity icons hidden
HomepageButtons	DIALER_BTN; CONTACT_BTN; BYNAME_BTN; VOICEMAIL_HOMEPAGE_BTN; WAKEUP_BTN; FILES_MANAGER_BTN; SETTINGS_BTN; LOCK_BTN	homepage	List of buttons in the ActionBar of Homepage-preview

HomepageContainers	webapp.contacts.getContactPreview;webapp.communication.getComlogPreview;webapp.manager.getManagerPreview	homepage	List of containers in Homepage-preview
HomepageKeyEdit	webapp.homepage.getHomepageStandardEdit	homepage key	allow editing keys in Homepage-standard
HomepageKeys	DIALER_BTN;CONTACTS_FAVORITES_BTN;COMMUNICATION_BTN;CONTACT_BTN;BYNAME_BTN;VOICEMAIL_HOMEPAGE_BTN;WAKEUP_BTN;FILESMANAGER_BTN;SETTINGS_BTN;;;LOCK_BTN	homepage	List of buttons in Homepage-standard
HomepagePreviewAutoFill	true	homepage	Auto fill Homepage-preview
HomepagePreviewMode	false	homepage	Select preview or standard homepage mode
HomepageProgKeys		homepage	List of the actions associated to Homepage-standard buttons
HomepageProgKeysLocalisation		homepage	Homepage translated labels for keys
HomepageStandardAutoFill	true	homepage	Auto fill Homepage-standard
HTTPProxyActivated	false	Proxy	Proxy enabled
HTTPProxyHost		Proxy	Customer LAN proxy
HTTPProxyPassword		Proxy	End-user LAN proxy password
HTTPProxyPort		Proxy	Customer LAN proxy port
HTTPProxyUsername		Proxy	End-user LAN proxy login
Ics1Url		Application server	Url of main ICS server
Ics2Url		Application server	Url of secondary ICS server
IctUserLocked	false	IctUser	current state of the LOCK
IMAPPort	143	eMail	For IMAP connexion - std
IMAPPortSSL	993	eMail	For IMAP connexion - when std fails
IMAPServer		eMail	

IMDefaultBuddyListName	~	IM	Name of the default Buddy list
IMPassword		IM	Password of the user on Instant messaging server
IMPrimaryServerAddress		IM	Corresponds to the complete address of the Instant Messaging server (https://server:port or http://server:port)
IMSoundActivated	true	IM	Indicates if the phone should make a sound when a new instant message is received
IsHelpAvailable	false	Help	indicate if the help button is available
IsLocalDateSet	false	configuration	indicate if the local date is set or not. If not, the date will then blink
Language	0	Phone configuration	List of the available languages as well as the selected one in the jsvalue
LdpLldpcfgCivicAddressLci		LLDP	Civic address localisation Value
LdpLldpcfgCoordinateBasedLocation		LLDP	Coordinate based localisation Value
LdpLldpcfgEcsElin		LLDP	ECS ELIN format localisation Value
LdpLldpcfgPowerAccepted		LLDP	If the switch accepts to provide the requested power value this setting is set to 'true'
LdpLldpcfgPowerPriority		LLDP	Power priority (level) requested by ICTouch to the switch
LdpLldpcfgPowerRequested		LLDP	Value of the power requested by ICTouch
LdpLldpcfgPowerValue		LLDP	The switch power answer to ICTouch
LocalEnetcfgSnmp	0.0.0.0	Network	SNTP Server
LocalEnetcfgSnmpRefreshPeriod	3600	Network	time (in Sec) between two SNTP synchronization actions
LoginName		Password	User login for login to ICS and ACS
LoginPassword		Password	User password for login to ICS and ACS
LogRemoteServerAddress		Log	Remote syslog server IP address
LogRemoteServerExist	false	Log	If true, logs can be redirected to a remote sylog server
LogRemoteServerPort	514	Log	Remote syslog server port value
LogRemoteServerProtocol	udp	Log	Remote syslog server IP protocol configuration
MagnifyEnabled	false	Phone configuration	Show / hide the Magnify button, and dezoom all zoomed webapp if hidden
ManagerWhitelist	webapp.managerassistant.getWhiteList	White list	Serve to show the WhiteList of ManagerAssistant in the settings
MinSearchCharacter	20	Search	Minimum of character to launch the research
MonitoringWatchDelay	0	Monitoring	Timer in minute between 2 memory check

MonitoringWatchRetry	100	Monitoring	Number of retry before reset terminal
MPAlarmVolume	0.5	Audio	Alarm speaker volume level
MPHandsetVolume	0.5	Audio	Handset volume level
MPHeadsetVolume	0.5	Audio	Headset volume level
MPPreviewVolume	0.5	Audio	Preview speaker volume level
MPSpeakerPhoneVolume	0.5	Audio	Speaker volume level
MyBluetooth	webapp.bluetooth.getMyDevices	Bluetooth	Serve to show the Bluetooth webapp in the settings
NewCallDefaultMethod	0	Communication	Set if the default keyboard shown is a numeric dialpad, or a 'filter and dial' keyboard
oldLoginName		IctUser	old login name
POP3Port	110	eMail	
POP3Server		eMail	
ProgKeysLocations	{label : 'Virtual Key', index : 'virtual'}	Programmable keys	List of the kinds of Progkeys available, usually Virtual and Physical
ProgKeysMax	100	Programmable Keys	
RebootOnCheckin	NONE	Telephony	defines if reboot of the phone is done on check-in
RegularResetActive	true	Scheduler	Enable/Disable the RegularReset
RegularResetSchedule	7200	Scheduler	Set the time of the RegularReset, in seconds
resetDataOnUserChange	true	IctUser	set to false to inhibit user data reset on user change
RingingBeforeValues	0	Calendar	List the different spans of time before starting the ringing (if one is added) of an agenda event
RoomName		Hotel	Define the room name
RoutingIcon		Phone configuration	Not used anymore
RoutingLabel		Phone configuration	Not used anymore
RoutingList		Phone configuration	Routing rules list (for example, 'on busy, forward to voice mail')
SaveRestoreLevel	0	Save Restore	Save/Restore level
SaveRestoreSchedule	1	Save Restore	Save/Restore time/frequency
SaveRestoreScheduleType	0	Save Restore	Save/Restore schedule type
SaveRestoreUrl		Save	Save/Restore url

		Restore	
ScreenSaverBrightnessOff	8	Screensaver	Level when brightness is off
ScreenSaverBrightnessOn	31	Screensaver	Level when brightness is on
ScreenSaverDelay	60	Screensaver	Delay before the Screensaver becomes active
ScreenSaverEnabled	true	Screensaver	Indicates if screensaver is activated
ScreensaverSlideshowDelay	4	Screensaver	The delay between changes during the Slideshow screensaver, in seconds
ScreensaverSlideshowList	screensaver_1.jpg;screensaver_2.jpg;screensaver_3.jpg	Screensaver	A list of the available images during a Slideshow screensaver
ScreensaverSlideshowLocked	true	Screensaver	set to true to prevent any user modification of the slideshow list
ScreenSaversList		Screensaver	list of available screensavers, label;technicalName[;boolean default]#...
ScreenSaversListChoice	screensaver	Screensaver	ScreenSaversList converted to type choice
ScreenTransitionEffect	false	Effects	Activate / deactivate the screen transition effect
ShowDoNotDisturbLabel	true	Phone configuration	Show / hide the 'Do Not Disturb' notification label in userinfo area
ShowKeyboardOnHookOff	true	Communication	set to false to avoid keyboard apparition when hooking off
ShowPlusButtonOnDialpad	true	Communication	set to false to hide the plus button on the dialpad
SIPAutoAnsweredAllowed		Telephony	Authorize auto answer to incoming call
SIPDNDActivateCode		SIP	DND activate SEPLOS code
SIPDNDDeactivateCode		SIP	DND deactivate SEPLOS code
SIPForwardAddress		SIP	Forward address
SIPForwardAddressBusy		SIP	Forward address when busy
SIPForwardAddressNoreply		SIP	Forward address when no reply
SIPForwardDurationNoreply	10	SIP	The time before the call is forwarded for no reply
SIPForwardOnBusyOrNoAnswerActivateCode		SIP	Forward on busy or no answer activate SEPLOS code
SIPForwardOnNoAnswerActivateCode		SIP	Forward on no answer activate SEPLOS code
SIPImmediateForwardActivateCode		SIP	Immediate forward activate SEPLOS code
SIPImmediateForwardOnBusyActivateCode		SIP	Immediate forward on busy activate SEPLOS code

SIPLocalConfEnable	true	SIP	Whether local conference is enabled (True) or web-service conference (False)
SIPLockActivateCode		SIP	Lock activate SEPLOS code
SIPLockDeactivateCode		SIP	Lock deactivate SEPLOS code
SIPMaxCall	5	SIP	The MAX number of calls the phone can support
SIPSEPLOSForwardDeactivateByDest Code		SIP	SEPLOS forward deactivate by destination SEPLOS code
SIPSEPLOSForwardDeactivateCode		SIP	SEPLOS forward deactivate SEPLOS code
SIPUseSeplos		Telephony	Seplos presence
SIPWakeupActivateCode		SIP	Wakeup activate SEPLOS code
SIPWakeupDeactivateCode		SIP	Wakeup deactivate SEPLOS code
SkinsList		Phone configuration	List of available skins (TEXT_CHOICE format)
SkinsListChoice	Default	Phone configuration	List of available skins
SMTPPort	25	eMail	
SMTPServer		eMail	
SyncEncrypted	false	Synchronization	Enable SSL encryption
SyncKeyInHomePage	false	Synchronization	Display the synchronization key in the home page.
SyncPINCode		Synchronization	default PIN code
SyncServerAddress		Synchronization	the PC address used to synchronize.
SyncServerPort	443	Synchronization	the listen port number of the remote PC.
SyncShowWrnOnLimit	true	Synchronization	Show a warning if the maximum of synchronized items is reached.
SyncStarted	false	Synchronization	Start a synchronization
SyncXMLArchive	10	Synchronization	Number of XML files to keep as archive.
TelephonyAssociateNumber		Telephony	Associate phone number
TelephonyAttendantNumber		Telephony	Attendant phone number
TelephonyBlindTransferAllowed	true	Telephony	Indicates if the blind transfer feature is available on this system.
TelephonyCheckin		Telephony	Checkin value
TelephonyDefaultDeflectNumber		Telephony	Default phone number for deflect
TelephonyDndState	false	Telephony	Interface telephony/presentation, Do Not Disturb on/off
TelephonyForwardDestinations	DST_ASSOCIATE;DST_ATTENDANT;DST_	Telephony	List of available forward destinations

	MOBILE;DST_VOICE_MAIL		
TelephonyForwardTypes		Telephony	List of available forward types
TelephonyHideIdentity	false	Telephony	Indicates if the phone number must be hidden by default.
TelephonyInterphonyAllowed	false	Telephony	Indicates if the user has the right to use the interphony feature.
TelephonyInterphonyStatus	false	Telephony	Indicates if the interphony mode is enabled or not.
TelephonyLockRemote	true	Telephony	Indicates if the pbx must be informed on lock.
TelephonyMobileNumber		Telephony	Mobile phone number
TelephonySimplifiedForward	false	Telephony	Simplified forward presentation for hotel application
TelephonyTransferAllowed	false	Telephony	Indicates if the transfer feature is available on this system.
TelephonyVmNumber		Telephony	Voice mail phone number
TimeFormat	true	Phone configuration	Current value of the Time Format between 12h (false) and 24h (true)
UserBackgroundPicture		Phone configuration	The picture to be used as a background for the application
UserFirstName		UserData	The user's first name
UserName		UserData	The user's name
UserPhoto	http://localhost/library/ICTouchAPI/themes/Default/images/avatar_70.png	UserData	The path to the user's photo
UserPresence	0	UserData	The user's state of presence (available / busy)
UserRole	Unknown	IctUser	Role for manager assistant application
